LCFF Budget Overview for Parents

Local Educational Agency (LEA) Name: Caruthers Unified School District

CDS Code: 10-75598

School Year: 2023-24

LEA contact information:

Marla Enmark

Assistant Superintendent

menmark@caruthers.k12.ca.us

559-495-7810

School districts receive funding from different sources: state funds under the Local Control Funding Formula (LCFF), other state funds, local funds, and federal funds. LCFF funds include a base level of funding for all LEAs and extra funding - called "supplemental and concentration" grants - to LEAs based on the enrollment of high needs students (foster youth, English learners, and low-income students).

Budget Overview for the 2023-24 School Year

Projected Revenue by Fund Source

All federal funds, $2,208,935 , 7%

All local funds, $1,627,477 , 6%

All other state funds, $2,464,431 , 8%

Total LCFF Funds , $24,030,051 , 79%

LCFF supplemental & concentration grants, $6,636,687 , 22%
All Other LCFF funds, $17,393,364 , 57%

This chart shows the total general purpose revenue Caruthers Unified School District expects to receive in the coming year from all sources.

The text description for the above chart is as follows: The total revenue projected for Caruthers Unified School District is $30,330,894.43, of which $24,030,051.00 is Local Control Funding Formula (LCFF), $2,464,431.46 is other state funds, $1,627,477.25 is local funds, and $2,208,934.72 is federal funds. Of the $24,030,051.00 in LCFF Funds, $6,636,687.00 is generated based on the enrollment of high needs students (foster youth, English learner, and low-income students).

LCFF Budget Overview for Parents

The LCFF gives school districts more flexibility in deciding how to use state funds. In exchange, school districts must work with parents, educators, students, and the community to develop a Local Control and Accountability Plan (LCAP) that shows how they will use these funds to serve students.

Budgeted Expenditures in the LCAP

Total Budgeted General Fund Expenditures, $32,622,332

Total Budgeted Expenditures in the LCAP $32,622,332

This chart provides a quick summary of how much Caruthers Unified School District plans to spend for 2023-24. It shows how much of the total is tied to planned actions and services in the LCAP.

The text description of the above chart is as follows: Caruthers Unified School District plans to spend $32,622,331.63 for the 2023-24 school year. Of that amount, $32,622,331.63 is tied to actions/services in the LCAP and $0 is not included in the LCAP. The budgeted expenditures that are not included in the LCAP will be used for the following:

N/A

Increased or Improved Services for High Needs Students in the LCAP for the 2023-24 School Year

In 2023-24, Caruthers Unified School District is projecting it will receive $6,636,687.00 based on the enrollment of foster youth, English learner, and low-income students. Caruthers Unified School District must describe how it intends to increase or improve services for high needs students in the LCAP. Caruthers Unified School District plans to spend $6,788,660.00 towards meeting this requirement, as described in the LCAP.

LCFF Budget Overview for Parents

Update on Increased or Improved Services for High Needs Students in 2022-23

Prior Year Expenditures: Increased or Improved Services for High Needs Students

Total Budgeted Expenditures for High Needs Students in the LCAP: $6,329,654

Actual Expenditures for High Needs Students in LCAP: $6,902,855
This chart compares what Caruthers Unified School District budgeted last year in the LCAP for actions and services that contribute to increasing or improving services for high needs students with what Caruthers Unified School District estimates it has spent on actions and services that contribute to increasing or improving services for high needs students in the current year.

The text description of the above chart is as follows: In 2022-23, Caruthers Unified School District's LCAP budgeted $6,329,654.00 for planned actions to increase or improve services for high needs students. Caruthers Unified School District actually spent $6,902,855.00 for actions to increase or improve services for high needs students in 2022-23.

Local Control and Accountability Plan

The instructions for completing the Local Control and Accountability Plan (LCAP) follow the template.

Plan Summary [2023-24]

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA.

Caruthers Unified is located in the central San Joaquin Valley, approximately 15 miles south of Fresno. The District covers a large rural area (120 square miles) of approximately 2,500 residents, including the two small unincorporated communities of Caruthers and Raisin City. An additional 4,800 people live in the area surrounding Caruthers. The goals of the Caruthers Unified School District are to:

1. Promote academic achievement for all students, including low-income, EL and foster youth students.
2. Maintain Safe and Healthy Schools with Positive Climates
3. Guide and Prepare Students for Post-Secondary Opportunities

The Caruthers Unified School District is comprised of 1568 students. Caruthers Unified is committed to promoting academic achievement for all students, including low-income, English Learners, and foster youth students. The educational programs start at our Family Services Center, which houses our Pre-School, Caruthers Elementary, Caruthers High School as well as MARC High School which is our continuation high school and adult school.

Of our 1,569 students, 88.9% of them are low-income (LI) and qualify for free and reduced lunch, 29.1% are designated as English Learner students, and 8.6% are students with disabilities. Less than 0.7% are Foster Youth, and 1.2% are homeless. Students in Caruthers benefit from the support they receive in a small community and are given the opportunity to participate in a variety of extracurricular programs involving athletics, community service and the arts. The Caruthers community has taken huge steps in the support of our district.

In the past several years the Caruthers community has passed two school bond measures: Measure C for Caruthers High School, and more recently Measure V for Caruthers Elementary. Both bond measures are the first in the history of the school district. CUSD students are also prepared to move on for future study. Over the past six years (2016-17 through 2021-22), 43% of Caruthers High School graduates have

been eligible to attend a four-year college or university, including 48% in the most recent year reported; 15% have earned the Golden State Seal merit Diploma.

Reflections: Successes

A description of successes and/or progress based on a review of the California School Dashboard (Dashboard) and local data.

GRADUATION RATES:
OVERALL. 92.3%
ENGLISH LEARNERS. 82.9%
LOW-INCOME. 91.8%
NON LOW-INCOME. 100%
FOSTER YOUTH n/d
HOMELESS n/d
STUDENTS/DISABILITIES n/d
We were pleased that, overall and for small groups, there were slight increases from 2021. Happily, the rate for English Learners increased by more than 12% points from the prior year, further closing that inequality and indicating that our English Learners are poised for continued success.

A-G COMPLETION RATES:
OVERALL. 48.2% (up from 32.8% in 2021)
ENGLISH LEARNERS. 22.2% (up from 21.7% in 2021)
LOW-INCOME. 47.7% (up from 30.7% in 2021)
NON LOW-INCOME. 68.8%
FOSTER YOUTH n/d
HOMELESS n/d
STUDENTS/DISABILITIES n/d
Overall and for the Low-income student group, there were large increases in the percentages of students in the 2022 graduation cohort meeting the requirements for admission to U.C. or C.S.U. -- 16.6% points and 17% points, respectively. English Learners saw a modest increase (.5%) in students meeting those admission requirements.

STATE ASSESSMENTS -- PERCENTAGES OF STUDENTS MEETING OR EXCEEDING STANDARD:
As shown in the data in the "Identified Need" section below, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard when compared to the prior year's results.

We were pleased to see significant increases in the percentages of students who responded in the 2023 survey that they feel safe at, and connected to school. The percentage who feel safe increased by 25% points, from 60.6% to 85.8%; and those feeling connected rose from 57.1% to 80.6%. Since our ultimate goal is for every student to feel safe and belonging at school, we will continue our culture and climate actions described in Goal 2.

The percentage of parents who responded that they feel welcome at their children's schools also showed a gratifying increase, from 81.3% to 92.0%. The percentage of parents who feel their children are safe at school also increased by double digits from 73.7 to 88.0%.

The percentages of teachers who feel safe at school and feel connected were both 100%.

Results for the Family Engagement instrument showed an improved rating of 4.1 (on a scale of 1 to 5) for family engagement responses.

Caruthers Unified continues to be successful in promoting collaboration with administration and teacher leadership teams, in communicating with their colleagues the direction and goals for our students, and in increasing focused instructional time.

The District provides instructional support for new teachers through a mentorship program to help them better meet the needs of low income and EL pupils and we are pleased with its success. Technology training and professional learning support for all staff that was provided to support the switch to distance learning has resulted in more effective use of technology to support classroom instruction..

Administrators also collaborate with ELD teachers and ELD leadership teams to improve and accelerate language acquisition as they continue implementation of the District's English Learner Master Plan aligned with the state's EL Roadmap.

Forums for parents to discuss and collaborate on expectations for our students have continued via parent committees and organizations, including School Site Councils (SSC), English Learner Advisory Committees (ELAC), the District English Learner Advisory Committee (DELAC), and the District's Parent Advisory Council (PAC).

Instructional support is provided for Low-Income students, English Learner students, and Foster Youth focused on primary grades on early literacy skills, language development, math and intervention through small class size (4th -12th grades), and an RtI program for reading or math supported by a credentialed teacher. Students are met with daily for strategic instructional support and thereby increasing academic achievement for unduplicated students.

The iReady program to support students through intervention and allow students to succeed academically is fully implemented and provides useful data for instructional decisions at the classroom, school, and District levels. The Response to Intervention aspect of the program is increasing annually .

The high school math teacher continues to be an excellent addition to the staff to provide support to struggling students, as have the social sciences and English teachers who were added to reduce class sizes and increase supports for unduplicated students in completing curricular graduation requirements, and to allow an additional advisory period for English Learners.

The District continues to maintain and upgraded facilities and provide a number of programs and activities to enhance the core curriculum and instruction in order to engage unduplicated students to become active participants in the school community. Students are served by various clubs and programs that made them feel safer and develop positive character, while at school. Students participate and or had access to Junior Doctor's and Doctor's Academy, athletics, Summer Bridge, and after school programs.

In the 2022-23 school year, the District continued to meet or exceed its 2023-24 desired outcomes for students to have an explicit post-graduation plan.

Providing access to devices and connectivity to the internet continues to be one of the District's successes. Every student has access to a device and, if needed, access to a hotspot for internet connectivity. The District consistently has reached out to families to ensure that students' technological needs are met. The level of tech support has been praised by staff and parents alike and resulted in the multifold improvements in teachers' comfort with technology that are described below.

The plan that follows will build on our prior successes by continuing those actions that have contributed to the general success, adapting them as necessary to address the needs identified in the section below. We will also incorporate additional actions identified through educational partners' input and/or a review of the data that will address students' academic and social-emotional needs.

Reflections: Identified Need

A description of any areas that need significant improvement based on a review of Dashboard and local data, including any areas of low performance and significant performance gaps among student groups on Dashboard indicators, and any steps taken to address those areas.

State assessments:
After a hiatus from 2019, the California School Dashboard results were again reported in 2022. We expected declines in the median scale scores of our students and their resulting distance from standard, due to the disruptions in instruction and traumatic experiences of the pandemic. The results were as follows:
ELA. CHANGE FROM 2019. MATH. CHANGE FROM 2019
OVERALL. - 36.8 18.8 DECLINE - 69.7 18.3 DECLINE
ENGLISH LEARNERS. - 57.8 17.8 DECLINE - 79.2 14.6 DECLINE
LOW-INCOME. - 44.6 23.8 DECLINE - 77.7 23.0 DECLINE
SWD. -125.4 42.0 DECLINE - 173.1 60.2 DECLINE
FOSTER YOUTH. n/d n/d
HOMELESS n/d n/d

"Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Low-Income students also experienced greater declines than their peers overall.

STATE ASSESSMENTS, MEETING OR EXCEEDING STANDARD:
2022 Change from 2021 2022 Change from 2021
ELA OVERALL. 37.7% 10.2% increase MATH OVERALL. 26.6% 8.4% increase
ENGLISH LEARNERS. 12.5%. 9.0% increase ENGLISH LEARNERS. 10.5% 8.8% increase
LOW-INCOME. 34.6% 9.4% increase LOW-INCOME. 23.7% 8.2% increase
NON LOW-INCOME. 59.4% 9.4% increase NON LOW-INCOME. 47.4%. 3.0% increase
FOSTER YOUTH n/d n/d FOSTER YOUTH n/d n/d
HOMELESS n/d n/d HOMELESS n/d n/d
STUDENTS/DISABILITIES 8.9% 6.5% increase STUDENTS/DISABILITIES 4.4% 2.0% increase
Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we can not disaggregate the "Distance from Standard' data for non-low-income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

EARLY ASSESSMENT PROGRAM (EAP), PERCENTAGE OF 11TH GRADE STUDENTS SCORING "READY"
ELA OVERALL. 9.3% MATH OVERALL. 1.8%
ENGLISH LEARNERS. 0%. ENGLISH LEARNERS. 0%
LOW-INCOME. 8.6% LOW-INCOME. 1.3%
NON LOW-INCOME. 52.4% NON LOW-INCOME. 14.3%
FOSTER YOUTH n/d FOSTER YOUTH n/d
HOMELESS n/d HOMELESS n/d
STUDENTS/DISABILITIES 0% STUDENTS/DISABILITIES 0%
Inequalities in percentages of 11th grade students scoring "Ready" in the EAP (exceeding standard on SBAC) are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

Teachers will continue to use iReady diagnostic assessments to identify strengths and areas of growth in English language arts and mathematics, in grades K-12. Other assessments, oral and written, administered by teachers will be combined with the iReady to identify skills and knowledge to be addressed. Expert teacher recommendation will also be strongly considered. Data from domains, lesson pass rates, and other measures will be examined at grade level, classroom, and individual student levels to plan instruction, supports, and interventions. Both EL and LI student groups lag behind other student groups, so those data will be examined in more depth. Teachers will continue to participate in professional development and peer collaboration to inform and adjust instruction. We will also examine what might have been done differently or in addition for SWD to identify and provide similar interventions for other unduplicated student groups.

Additionally, the District will address performance the performance inequalities described above by a multi-pronged approach, including increased access to counseling services at the high school, increased academic guidance and academic opportunities to participate in a broad course of study in preparation for postsecondary eligibility to better meet the needs of low income and EL pupils, and monitoring of students' progress in meeting post-secondary eligibility, utilizing various data systems to review graduation requirements, A-G and CTE completion, and enrolled in courses necessary to apply to four-year universities, prepare for enrollment in a community college, and/or prepared to successfully enter the military or workforce after graduation. Goal 3 in the LCAP demonstrates the District's commitment to having all of our students graduate from high school with a plan for post-secondary success.

In addition to the data cited above, English Learners meeting U.C. or C.S.U. admission requirements are 26% points behind the graduation cohort at large. English Language Proficiency Assessment for California (ELPAC) Summative results show that less than half (45.6%) of our English Learners are making a year or more growth in acquiring English language skills. The District recognizes the need to take steps to better address the needs of our English Learners. Because English Learners have not shown the same pace of improvement in ELA as other student groups, the District completely revised and began implementation of its English Learner Master Plan to be aligned with the English Learner Roadmap. Included in this plan are practices that will more closely monitor the progress of EL students and RFEP students, and immediately adjust instruction as warranted by data and students' needs.
An additional ELD class at CHS to lower class size and provide greater individual attention has been added to Action 1.9 to address the needs of English Learners at the high school.

A more systematic approach in analyzing data remains a need. Implementation of the data systems and analyzing data from supplemental materials to assess the effectiveness of various supplemental programs remains a work-in-progress. Staffs have not had the anticipated planning time due to a lack of subs to allow teacher release time.

CHRONIC ABSENTEEISM:
OVERALL 36.9%
ENGLISH LEARNERS 39.0%
LOW-INCOME 38.1%
NON LOW-INCOME 27.9%
FOSTER 54.5%
HOMELESS n/d
STUDENTS/DISABILITIES 58.5%
Chronic absenteeism rates continued to increase from the prior year and the baseline year, resulting in the District and each student group being assigned the "very high" performance level for this indicator, wherein "very low" would be considered the most desired outcome. Significant inequalities are evident when comparing Low-Income students, English Learners, Foster Youth, and Students with Exceptional Needs to non-low-income students. The data also show that the latter two groups are also chronically absent at a much higher rate than the overall population.

We will continue to address Chronic Absenteeism by providing social-emotional and mental health supports in order to ensure that our students feel safe and connected to their schools, including continued, significant increases in the budgets for those services and social-emotional learning (SEL). These services will include hiring and/or retaining staff to provide behavior intervention and support, focused on providing services to Low-Income students, English Learners, and Foster Youth in grades TK-12 impacted by the pandemic, their parents, and the staff who work with them; increasing students' social-emotional development through teaching, modeling, and practicing social-emotional skills that support a safe and positive climate for learning, and; providing staff development and collaborative time focused on teaching, modeling, and practicing social-emotional learning (SEL) skills that support a positive climate for learning and work.

In consultation with site principals, the need for a complex approach to closing those inequalities was identified. The District will continue the social-emotional supports of Action 2.3, listed above, and the increased access to transportation (Action 2.4) to reduce Chronic Absenteeism. Complimentary activities will be the school sites reviewing absences and determining the need to send a SARB warning letter, and the sites establishing incentives for attendance.

SUSPENSIONS:
OVERALL 4.7%
ENGLISH LEARNERS 3.8%
LOW-INCOME 5.0%
NON LOW-INCOME 2.4%
FOSTER 0%
HOMELESS 4.2%
STUDENTS/DISABILITIES 3.7%
With the resumption of full in-person instruction in 2021-22, suspension rates more than doubled overall and for most student groups. Rates for Low-Income students are higher than overall rates, and more than twice those of non-Low-Income students. English Learners, Students with Exceptional Needs, and Homeless youth all showed increased rates from the prior year.

Spending almost two years in virtual and/or part-time instructional settings had a significant impact on students' behaviors and abilities to interact with others. Educational partners have noted that many students at all grade levels needed to "relearn" appropriate in-school behaviors as they exhibited more relaxed behaviors such as they might at home. This need to "relearn" extended to interactions with peers. Partners have also expressed concerns that motivation appeared to be lacking among many older students at the middle and high school levels.

We will continue to address Suspension Rates by providing social-emotional and mental health supports in order to ensure that our students feel safe and connected to their schools, including continued, significant increases in the budgets for those services and social-emotional learning (SEL). These services will include hiring and/or retaining staff to provide behavior intervention and support, focused on providing services to Low-Income students, English Learners, and Foster Youth in grades TK-12 impacted by the pandemic, their parents, and the staff who work with them; increasing students' social-emotional development through teaching, modeling, and practicing social-emotional skills that support a safe and positive climate for learning, and; providing staff development and collaborative time focused on teaching, modeling, and practicing social-emotional learning (SEL) skills that support a positive climate for learning and work.

While the dropout rate (2.7%) reflects the small size of the cohort, the District is committed to all students completing high school.

Students with Disabilities were assigned the "very high" performance level for Chronic Absenteeism and the "very low" level for Distance from Standard in ELA and math, resulting in the District becoming eligible for Differentiated Assistance (DA) from the Fresno County Superintendent of Schools (FCSS). The District continues to provide additional support for its students with disabilities, and is actively collaborating with staff from FCSS to address the areas that resulted in its eligibility for DA.

LCAP Highlights

A brief overview of the LCAP, including any key features that should be emphasized.

The following features continue to be priorities for the District:

- District instructional staff will participate in targeted professional development to improve practice that uses student data to make instructional decisions and enhances the available strategies that teachers have to promote learning for high needs students and students with exceptional needs.

- A Reading Lab that will support accelerated reading improvement for low-income students, English Learners, students with exceptional needs, Foster Youth, and homeless students.

- Collaborate with preschool to support the successful transition of those pupils to elementary school.

- Supplemental materials and access to technology that will provide students with exceptional needs fuller access to the core curriculum.

- Extended learning programs for learning recovery, acceleration, enrichment, English language development, credit recovery, and original credit classes for grades TK-12.

- Continued implementation of its English Learner Master Plan aligned with the English Learner Roadmap, including practices that will more closely monitor the progress of EL students and RFEP students.

- Sufficient clean, safe classroom spaces and additional staff to maintain reduced class sizes in 4th – 12th grades.

- Family Liaisons to help actively engage parents and families in their children's learning.

- Staff to provide behavior intervention and support, focused on providing services to students impacted by the pandemic, their parents, and the staff who work with them. Increasing students' social-emotional development through teaching, modeling, and practicing social-emotional skills that support a safe and positive climate for learning.

- Increased access to counseling services and supports to monitor students' progress and increase the number of students that are poised for post-secondary success.

- Expanded access to recreation spaces.

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

MARC High has been identified as eligible for Comprehensive Support and Improvement.

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

The District will provide the following support to the identified school in developing and implementing a CSI plan that includes a school-level needs assessment, evidence-based interventions, and the identification of any resource inequities:
- Create a CSI Improvement Team consisting of school partners and District leadership;
- Designate a District "lead" to serve as the point of contact for services related to Comprehensive Support and Improvement requirements and activities;
- Provide technical assistance in plan development, monitoring, and evaluation;
- Identify connections between the SPSA and the District's LCAP to ensure that the school is aware of District-wide actions in the LCAP that can be leveraged to support improvement;
- Provide evidenced-based intervention training and support to the identified school. The selection, implementation, and monitoring of evidence-based interventions should reflect considerations of the school's needs assessment and local context;
- Develop team capacity in continuous improvement, including PDSA (Plan, Do, Study, Act) cycles;
- Review data collection, analysis, and reporting to improve monitoring and evaluation of actions to address CSI.
- Protect time for improvement work, including regularly scheduled meetings to monitor and review.

The local needs assessment will be conducted by the CSI Improvement Team comprised of the school principal, a teacher from the school, and the District's Assistant Superintendent. The Team will examine student data, classroom practices, and input from other school staff, parents, and students. The District will support the school site staff in the development of the School Plan with the assistance of the Assistant Superintendent. The District will also use the services of a consultant with broad experience in SPSA development, state and federal regulations, and plan alignment. The surveys and data used in conducting the local needs assessment included in the School Plan are administered by the District, which will support release time, as needed, for data evaluation and root cause analysis by the school staff The District's Chief Business Officer will provide support in fiscal analysis to determine if any resource inequities existed.

Evidence based interventions will be identified and selected through a process of examining research into the nature of the intervention, its effect size, and consideration of the likelihood of success within the local context. Since they will be implemented school wide, all teachers will participate in the consideration and selection of the interventions.

Possible resource inequities will be identified by examining the data and educational partners' input during the needs assessment, and the review of District and school-level budgets cited above. The Assistant Superintendent, CBO, and the consultant will provide guidance to the school principal and site staff regarding how resource resource inequities might be identified, and that all resources, not just fiscal, must be examined.

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

The District and MARC High will use the process outlined below to collect, organize, and examine the data necessary to evaluate the implementation and effectiveness of the CSI plan:
- Plan approval by the Caruthers Unified School District Board of Trustees before the beginning of the 2023-24 school year;
- Regularly scheduled meetings – at least four times per year – of the CSI Improvement Team consisting of school partners (staff, parent, student) and District leadership. Meetings shall include:
- Review and analysis of data related to suspension rates, and any other state and local metrics identified in the school's CSI plan, and identification of next steps to be taken based on that analysis;
- Review and analysis of data related to 'implementation progress markers" identified in the school's CSI plan, and identification of next steps to be taken based on that analysis;
- The effectiveness of the plan shall be based on whether the actions in the plan are being implemented i a timely fashion, and whether the ongoing suspension data shows the rate to be declining with implementation of the plan. The final evaluation of its effectiveness will be based on the school exiting CSI.
- Reports to the Superintendent or designee regarding progress;
- Summative review, analysis, and evaluation of the plan to determine if revisions to the CSI plan, SPSA, and/or LCAP are recommended for the following year.

Engaging Educational Partners

A summary of the process used to engage educational partners and how this engagement was considered before finalizing the LCAP.

The Caruthers Unified School District Governing Board, Superintendent and staff believe in "Success through Partnership." The 2021-24 Local Control and Accountability Plan (LCAP) Goals and Actions are the result of a collaboration between the community and the District. The District has an ongoing practice of engaging educational partners throughout the school year to discuss providing instructional supports and interventions.

The District Superintendent, site administrators, and school liaisons reached out to families to encourage participation. Caruthers Unified School District regularly holds meetings with educational partners to review and provide input on topics that included addressing learning loss, providing supports to students, and meeting the needs of struggling learners. Educational partners are presented with current goals, actions, expenditures, and data, and invited to ask questions, suggest changes, or confirm the direction of the District's efforts to implement initiatives that are broadly understood and supported.

The engagement process for our educational partners began with the presentation of data and prior actions to support students' success to the groups listed below during the Spring of the 2022-23 school year. Questions and suggestions were gathered to guide plan development. The District's proposed goals and actions to provide a comprehensive instructional program for all of our students, with increased or improved services to support our neediest students, was a primary topic at all meetings. All meetings were accessible to anyone wishing to participate. A Spanish translator was available at all parent and community meetings.

Outreach to educational partners included meetings and surveys. Those surveyed included certificated and classified staffs, students, and parents. The following formal meetings and consultations were conducted to gather comments and suggestions regarding the Goals, Actions/Services, Outcomes, and Evaluation of the District's Plan in considering changes for 2023-24:

- District Administration/Principals Meeting – Ongoing through the school year.
- Classified Bargaining Unit including all Classified Staff Educational Partners Input Meeting -- March 9, 2023.
- Certificated Bargaining Unit including Teacher Educational Partners Input Meeting -- March 9, 2023.
- Parent and Community Educational Partners Input Meeting – March 13, 2023.
- Student Input Meeting – March 15, 2023.
- SELPA Consultation -- The District consulted with the SELPA through attendance at its monthly Operations Committee meetings and individual consultation with staff. Student records for the students receiving services from FCSS were reviewed to ensure information was up-to-date and parents were receiving appropriate notification regarding their child's services. Based on input from SELPA staff and discussions with committee members, the District's Student Services team ensured that actions in the LCAP for persons with exceptional needs were aligned with the strategies in the Local Plan for students with disabilities. The support needs for students with disabilities will be part of planning for this plan.
- Parent Advisory Committee (PAC) Input on LCAP Draft -- May 9, 2023.

- District English Learner Advisory Committee (DELAC) Input on LCAP Draft – May 9, 2023.

During educational partner input meetings with the PAC and DELAC committees, no questions were submitted that would require a written response from the District Superintendent.

The Public Comment period ran from May 10, 2023 to May 31, 2023. A draft of the LCAP was made available to educational partners by request at the sites and on the school website. Comments could be provided to school site administrators for consideration. The draft was also presented to the Parent Advisory Committee (PAC) and the District English Learner Advisory Committee (DELAC) on May 9, 2023 for questions and comments. The public hearing of the plan was held on May 22, 2023.

The LCAP that was submitted for Caruthers USD Governing Board approval was posted on the District's website and a link included in the Board agenda, posted 72 hours prior to the meeting.

The Plan was approved at the Board meeting of June 26, 2023. Subsequently, the Board also approved the District Budget at this meeting. The Local Indicator Report was also presented.

The approved plan was submitted to the Fresno County Superintendent of Schools on June 27, 2023.

A summary of the feedback provided by specific educational partners.

2023 Parents:
Several parents gave high marks for staff communication, approachability, and accessibility.
Zero tolerance for bullying and stricter disciplinary measures was a notable theme for improvement from parent responses. Various ideas related to communication were frequently expressed, including earlier notice of academic problems; maintaining and updating the website so parents can plan; and improved communication from sports and PE programs. Other suggestions were cultural events to expose the children to different cultures and improved cafeteria offerings.

2023 Support Staff:
A consistent theme was the positive climate and relationships among employees to support the students of Caruthers Unified, that "All the staff genuinely care about our students safety and work together to make sure they are meeting their academic goals," and "I feel valued." Suggestions for improvement included reducing class sizes where there are more than 25 students. Another theme was the need for more timely maintenance and repair of facilities.

2023 Teachers:

Teachers echoed the support staff's strong theme of a very positive culture, citing "strong, consistent, and caring teachers who are committed to the education of every student that walks through their doors. This consistency and commitment translates to a staff that is ready to work with all students to help them achieve academic, athletic, and personal success." Specifically mentioned by respondents were the "academically challenging courses," "community service," and "personal enrichment and extended learning opportunities." Also lauded were the support staff, administrators who are invested in students, and providing on-site substitute teachers.

There were several themes for suggested improvements. While some agreed that there was a team approach and that teachers "have a voice," several others suggested that "positive change could happen if teachers are included in more of the decisions that affect teachers/students." Several also suggested that increased time for collaboration among different grade levels would support better planning for student outcomes. Providing more timely communication to staff was also cited. Students' behavior (regarding social media and confrontational behaviors) was a concern, especially in the expanded learning program, where it was noted that "student behavior...drastically different for school day expectations." Regarding behavior, it was also suggested that a truancy officer could help with chronic absenteeism. Finally, there was a strongly expressed concern that students in need of mental health supports were frequently not receiving those services, with counselors being pulled from counseling appointments to sub in classrooms.

2023 Students:
Of the 588 students who responded, 88% were Low-Income students, 11% were English Learners, and less than 1% were Foster Youth. As with other partner groups, the positive, "family-like" environment and culture of helpfulness among students and between students and "teachers [who] are very understanding and helpful" was extremely evident. Also cited was the support system and the counselors "to help you when you need it." Students also gave good marks to sports programs, the after-school program, clubs, and extracurricular activities like FFA, Helping Hands, Doctors Academy, etc., though several also often suggested providing more events and clubs in school. These contrary responses did not appear to be related to different school levels.
Students' behavior was a concern of several students, who mentioned a lack of respect for adults and their peers. Incidences of physical confrontations among students were mentioned. A repeated suggestion was an increased security presence "to make [it] feel less hostile." Also suggested was discipline based on an acknowledgement of why the students may have behavioral problems. Having a later starting time was frequently mentioned, as was more learning activities to make learning more fun. Keeping bathrooms in good repair was another theme. Another theme was students' interest in having more covered, outside seating areas. Perhaps unsurprisingly, three oft-repeated requests were for improved cafeteria offerings -- with some very specific menu suggestions -- for relaxing the dress code, and for less classwork/homework.

2023 Administrative Staff:
In consultation with site principals (2/1/2023), the need for a multi-faceted approach to closing inequalities in Chronic Absenteeism rates was identified. In addition to providing social-emotional supports to encourage regular school attendance, the other approaches identified by school administrators to address Chronic Absenteeism inequalities will be school sites reviewing absences and determining the need to send a SARB warning letter, and the sites establishing incentives for attendance. Administrators have held fruitful discussions with high school staff and agreed that adding social-emotional healthy living curriculum with subject-matter writing to PE classes would result in better ELA outcomes and increased student connectedness.

2022 Students
Students' concerns appeared to be more focused on three areas: behavior, extra academic supports, and preparation for post-secondary success.
Several responded that bullying should be addressed, possibly with a therapist to help mediate problems and to get students to talk with each other. Students were also concerned about vaping in the bathrooms, and asked for the problem to be addressed. Students were appreciative of smaller class sizes, and that small class sizes have helped with better connections with teachers. One-on-one support was still noted as needed to help students succeed. Students with exceptional needs who responded were impressed with SPED Department and think they are doing a great job, with helpful program that include the Coffee Shop and sports that help them feel connected and important at school. Students expressed several ideas around the theme of post-secondary preparation: An emphasis on roles or path for high school and beyond, possibly creating cohort groups that stay with same advisory teacher all four years to feel connected to help for students to establish a path for after high school and great bond to teacher and students in class. They asked that college field trips continue, as they are important and have really helped in showing the path to college is available. Finally, regarding post-secondary preparation, another suggestions was to provide more AP prep test books, an SAT prep course, and increased counseling services. Students also mentioned the addition of an ASL course because they have read there is a shortage of experts to sign for meetings and events.

2022 Staff:
Support for English Learners was a theme among the staff respondents, with the suggestions that the District increase in salary schedule to get EL aides for the high school, and make those full time EL aide positions to retain them. Additionally, more support for teachers to further support EL students, including increased EL resources in the classroom for students to use for additional support, such as translating apps. Staff echoed the students' ideas to enhance college and career readiness. Teachers suggested start students' exposure to college readiness in their Freshman year, rather than advisors starting to have those discussions with students in their Junior or Senior year when it may be too late to create a plan for post-secondary preparation. They also suggested broadening the Doctor's Academy, as it gives early insights to students and helps making career decisions.
The third theme among staff was issues with how to motivate students are becoming more challenging. Training was requested , and that whatever training is provided, to include classified staff in training. Under that umbrella of motivation, professional development on dealing with pervasive social media was requested.

2022 Parents:
More than any other theme was the expression from parents that the District and schools are doing a great job and to continue on the path established in the current plan. Support for English Learners was also a theme among parents who provided input, including more teachers for the elementary school to support English Learners, to provide resources for English Learner families, including more explanation for families on ELD and the EL program so they can stress the importance of study to their children at home. Parents were pleased with the safety and climate measures undertaken at Caruthers Elementary: the gated campus with adults always watching the students after school makes their children feel valued and safe. However, there were some who raised concerns about bullying and inappropriate comments on the schoolyard, suggesting that yard duty teachers to pay closer attention to what the students do while on yard. "Healthy Lifestyle" was selected as an area of focus by almost one-half of parents who responded. A final theme was regarding after-school programs, and the need for those to be increased.

A description of the aspects of the LCAP that were influenced by specific input from educational partners.

A foundational principle of Caruthers USD is the need to be responsive to our students, staff, families, and community. As a result of their suggestions, the following actions or services have been included in the 2021-24 LCAP:

Goal 1 --
- Provide expanded academic supports in both the elementary and high schools.
- Hotspots and insuring internet access as part of supplemental materials, including technology supports.
- Continuance of increased instructional aides FTE for English Learners in response to input.
- The budget for Action 1.9, supports for English Learners, was increased from the 2022-23 planned expenditures.

Goal 2 --
- The District will make a strong commitment social-emotional supports for students and disseminating information on the availability of those.
- Maintain increased communication with parents in both English and Spanish.
- Increased counseling services.
- The District will expand access to recreational/play areas, including co-curricular and extra-curricular activities to address the students' dissatisfaction with school grounds and parents' desire for healthier lifestyles for their children.
- As a result of input from educational partners, the following additions were made to Action 2.3 -- "School site staffs will regularly review attendance data to assess if students are on track to be chronically absent. The parents of those who appear to be will be sent a letter noting the absences and consequences of poor attendance. "Schools will establish local attendance incentive programs."

Goal 3 --
- Continue implementation of hiring student tutors.

Goals and Actions

Goal

Goal #	Description
1	Promote academic achievement for all students, including low-income, English learners, and foster youth students.

An explanation of why the LEA has developed this goal.

The "Identified Needs" presents the data and descriptions that demonstrate inequalities that exist between student groups. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non Low-Income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas. Though the numbers are too small to allow them to be reported, we know from experience that our Foster Youth also experience these academic inequalities. Goal 1 is designed to lessen and mitigate those inequalities.

The basic purpose of education is to promote literacy and numeracy for all students, and the actions described under this goal are all designed to achieve that purpose. The metrics associated with this goal provide the necessary data to monitor and evaluate the effectiveness of those actions. A more systematic approach is needed in analyzing data to assess the effectiveness of various supplemental programs utilizing the data systems and analyzing data from supplemental materials.

Educational decisions will be student-centered and informed by excellent data collection, analysis, and appropriate input from our educational partners.

		California State Standards and subject matter frameworks. Areas may include, but not be limited to: • Math • ELA • Science • Social Science • Kagan Structures • Assessment Training/Conference • ERWC • Instructional Strategies •		
1.3	Student Data and Assessment	To increase academic outcomes for students and decrease inequalities in performance results between Low Income students, English Learners, Foster Youth, and their higher-performing peers, the District will provide the following data sources for ongoing assessment of students' progress and to inform instructional decision-making focused on supporting Low Income students, English Learners, Foster Youth, including those with exceptional needs: • Illuminate Data • Benchmarks • Self-Assessments/Rubrics •	$21,000.00	Yes
1.4	Supplemental Instruction and Materials	To increase academic outcomes for students and decrease inequalities in performance results that affect Low-Income students, English Learners, and Foster Youth, the District will research, purchase, and implement supplemental instructional materials that will support acceleration and mitigate learning loss. The District will purchase and use specific reading materials that will support accelerated reading improvement for those students. The District will make decisions based on evidence. The materials and implementation strategies may include:	$1,429,715.00	Yes

Action #	Title	Description	Total Funds	Contributing
		- Instructional Programs that are Supplemental to Core - Supplemental English Language Arts Support Curricula - iReady Math and Reading - Technology to Implement Supplemental Curricula - Staff and supplementary materials to conduct a District Reading Lab that provides intensive intervention and support for Low-Income students, English Learners, and Foster Youth who are struggling in reading, including increased instructional aide support. - Guided Reading Materials that are supplemental to the core reading program - Continue an Opportunities Class teacher to conduct classes that will address learning loss on a more individual basis.		
1.5	Instructional Leadership and Guidance Support	School effectiveness research supports the need for school leaders to exhibit strong instructional leadership, especially in supporting teachers in developing the individual self-efficacy that combines into collective self-efficacy. In order to maintain and build effective site leadership that leads to increased academic outcomes for students and decreased inequalities in performance results between Low-Income students, English Learners, Foster Youth and the higher-performing student groups, the District will support the following activities: - Coaching, extra time, and professional learning activities for School Leadership Teams - Coaching, extra time, and professional learning activities for instructional planning, design, and support	$343,438.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.6	Early Childhood Education	To increase academic outcomes for students and decrease inequalities in performance results between Low-Income students, English Learners, Foster Youth and higher-performing student groups, the District will actively collaborate with preschool to support the successful transition of those pupils to elementary school, including the participation of their parents and families, and those of students with exceptional needs, in preparing for the transition.	$66,868.00	No
1.7	Students with Exceptional Needs	To increase academic outcomes for students and decrease inequalities in performance results between Students with Disabilities and higher-performing student groups, the District will provide supplemental materials and access to technology that will support greater success in the core curriculum. The District will also provide professional development for teachers in supporting student with exceptional needs.	$1,998,463.00	No
1.8	Extended Learning	To increase academic outcomes for students and decrease inequalities in performance results between Low Income Students, English Learners, Foster Youth and higher-performing student groups, the District will provide extended learning programs for learning recovery, acceleration, enrichment, English language development, credit recovery, and original credit classes for grades TK-12. that include: Before and/or After School extended learning sessions Tutoring Summer School	$687,327.00	Yes
1.9	Improving English Language Development Instruction	All English Learners in CUSD are provided daily designated and integrated instruction and supports in English Language Development. To increase academic outcomes for students and decrease	$265,221.00	Yes

Action #	Title	Description	Total Funds	Contributing
		inequalities in performance results between English Learners and higher-performing student groups, the District will: • Provide teachers with professional development in ELD strategies that increasing English Learner students' access to the core. • Provide teachers with professional development in ELD strategies that accelerate English Learner students' acquisition of English. • Provide English Language Development enrichment and support materials that accelerate English acquisition and increase access to the core. • Provide increased paraprofessional support for small groups and individuals • Additional ELD class at CHS to lower class size and provide greater individual attention. • Continue implementation of its English Learner Master Plan aligned with the English Learner Roadmap. Included in that plan are practices that will more closely monitor the progress of EL students and RFEP students, and immediately adjust instruction as warranted by data and students' needs. •		
1.10	Smaller Class Sizes	To increase academic outcomes for students and decrease inequalities in performance results between Low-Income students, English Learners, Foster Youth and higher-performing student groups, the District will provide staffing to maintain smaller class sizes in 4th through 12th grades.	$2,644,534.00	Yes
1.11	Access to a Broad Course of Study	The District will plan master schedules at the secondary level to ensure that Low-Income students, English Learners, Foster Youth, and students with exceptional needs have access to a broad course of study in the middle school and high school. Students in grades K-6 will participate in full curriculum that includes science, social studies, and the arts.	$6,594,461.00	No

Action #	Title	Description	Total Funds	Contributing
		The District is committed to making certain all students have equitable access to a broad, high-quality course of study. To that end, the District will hire and retain outstanding administrative and support staff to ensure the needs of students, teachers, and parents are met to achieve exceptional outcomes. District educational partners also understand the importance of engagement programs and activities to enhance the core curriculum. We will continue to engage students through clubs, athletics, programs, and any other extra- and co-curricular activities that allow pupils to become active participants in the school community.		

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

The metric associated with Action 1.1 -- the percentage of the District's teachers appropriately credentialed and assigned -- was impacted by the change in definition of "appropriately credentialed" to no longer include teachers still working on clear credentials, even though they are still allowed by state law and the California Commission on Teacher Credentialing provide instruction. Because there were no vacancies and every student was provided appropriate instruction, we consider implementation of this action to be successful.

Though finding sufficient substitute teachers continued to be a challenge to providing planned professional learning activities, Action 2 was implemented much more successfully this year. All new CES teachers participated in Kagan Structures training to support positive and engaging classroom procedures. School administrators have observed implementation of those structures in classrooms. Several gave up time in their summer to engage in math training through Tulare COE and math talks have been added to their instructional practices. All teachers were provided training in using iReady, and individual consultations with teachers were conducted. Staff from FCSS held trainings for CES teachers on resources available through their library portal. CES held a January training on setting reading goals.

The Illuminate program was widely used, benchmark and other local assessments were administered, and the data collected from interim assessments was discussed by teachers and used to make instructional decisions, so Action 1.3 was implemented as planned.

Action 1.4 has both successes and challenges in implementation. Shortages and shipping issues continued to be experienced by some of our vendors, causing challenges in purchasing all of the materials we planned. Among our successes in implementation were iReady

diagnostics, which were successfully used to provide data and support at all school levels; the District Reading Lab which provided support to 125+ students. Supplemental reading materials were purchased for Social Studies classes to provide ELA in content areas. Another supplemental program, Data-based Query was used to prompt writing in subject areas. Supplemental materials are reviewed by the teacher(s) and principal prior to re-ordering. Guided Reading materials that are supplemental to the core reading program were used in CES K-4 classrooms. The Opportunities Class teacher conducted classes that addressed learning loss on a more individual basis.

Action 1.5 was successful, as we continue to build the capacity of staff members to assume leadership roles; at both schools, the staffs are taking ownership for desired outcomes and results. Weekly meetings support alignment of practices with goals and actions. Site leaders are taking on expanded roles at the District level that will further benefit our Low-Income students, English Learners, and Foster Youth. The guidance and support of the school leadership teams contributed to successful implementation of the state standards in all classrooms.

The District actively and successfully collaborated with preschool to support the successful transition of those pupils to elementary school, including working with their parents and families , in implementing Action 1.6.

Action 1.7 was implemented successfully. CHS students with IEPs had both an assigned support block and small group instruction. Due to the Response to Intervention (RtI) efforts, CES students had increased time for academic support. The exception was the planned professional development, which was not carried out to the extent planned due to the challenge of a lack of substitute teachers.

The District contracts with the Fresno County Superintendent of Schools (FCSS) to implement a substantial part of the after school expanded learning program that is part of Action 1.8, and challenges were faced by both FCSS and CUSD in hiring expanded day staff. We were also challenged by a lack of interested personnel during the summer, and were not able to offer the breadth of classes planned, though all students who wished to participate in expanded learning were able to do so.

Increased paraprofessional time for our English Learner students contributed to the successful implementation of Action 1.9. Additional successes were the addition of an ELD section at CHS to lower class size and provide extra individual attention to our English Learners. Imagine Learning was used as supplemental ELD material for after school program at CES. All teachers participated in planned ELD professional development and CES teacher began common planning for designated ELD.

Action 1.10 was successfully implemented as planned; salary increases led to an expenditure that exceeded what was originally budgeted.

All of our students were provided access to a broad course of study, confirming that implementation of Action 1.11 was successful.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 1.4 -- Under Budgeted: Spent more than budgeted due to utilizing more federal and state funds than anticipated to provide this action. No other actions were reduced as a result.

Action 1.5 -- Under Budgeted: Spent more than budgeted due to coding a position that was originally planned for Goal 2, Action 3 but was charged to this action instead.

Action 1.8 -- Under Budgeted: Spent more than budgeted due to receiving more state ELOP and federal funds than anticipated and using those funds to support this action.

Action 1.9 -- Over Budgeted: Spent less than budgeted because the costs for this action were less expensive than anticipated.

Action 1.10 -- Under Budgeted: Salary increases led to an expenditure that exceeded what was originally budgeted.

An explanation of how effective the specific actions were in making progress toward the goal.

Action 1.1 -- Because close to 80% of teachers held clear credentials, there were no vacancies, and every student was provided appropriate instruction, we consider this action to to be effective.

Action 1.2 -- Though finding sufficient substitute teachers continued to be a challenge to providing planned professional learning activities, Action 2 was implemented much more successfully this year, as explained in the first analysis box, above. As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action has been effective in enhancing classroom instruction and increasing academic outcomes for Low-Income students, English Learners, and Students with Exceptional Needs.

Actions 1.3, 1.4, 1.5, 1.7. 1.8, and 1.10 -- Though the overarching purpose of Goal 1 is to increase students' academic outcomes and close inequalities between student groups, this collection of actions are particularly designed to that end. Based on the metrics used to measure the effectiveness of those actions, they have not been as effective as planned. As shown in the Identified Needs section of this plan, "Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we can not disaggregate the "Distance from Standard' data for non-low-income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.
However, there are some indicators of effectiveness, as shown in the data in the "Identified Need" section of this plan. The "Distance from Standard" metric, used for state accountability purposes, can only be compared to the pre-pandemic baseline from 2019. When we are able

to compare more recent data (2021 v. 2022) we see that, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math in 2022 when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. The data indicate that, despite continuing inequalities, these actions, including more purposeful use of data, providing supplemental instructional services such as iReady and the Reading Lab, ensuring coaching and extra time to support school leadership teams and instructional design, supports for students with exceptional needs, extended learning sessions that include tutoring, summer school, and before/after school sessions, and additional teachers to provide smaller class sizes has had a positive impact on increasing academic outcomes for Low-Income students, English Learners and Students with Exceptional Needs who experienced learning loss during the pandemic.

Action 1.6 -- All students transitioning from preschool to Caruthers Elementary did so successfully, with all students enrolled in preschool enrolling-in and completing TK, confirming the effectiveness of this action.

Action 1.9 -- A close examination of the data indicate that this action has been effective. As noted above, English Learners continue to experience inequalities in academic outcomes in relation to students overall. English Language Proficiency Assessment for California (ELPAC) Summative results show that less than half (45.6%) of our English Learners are making a year or more growth in acquiring English language skills. This is likely the results of our English Learner students having been disproportionately affected by the pandemic. For example, from 2019 to 2021, pandemic learning loss was reflected in a 34% decline in the overall percentage of students meeting or exceeding standard on the SBAC ELA assessment, and a 46% decline in math. During that same period, Low-Income students saw similar declines of 36% in ELA and 52% in math. English Learners, however, experienced far more drastic declines of 64% in ELA and 90% in math. From 2019 to 2022, our English Learner students have had a steeper hill to climb to get back to pre-pandemic levels; recent data suggest that they are making that climb to greater success. Though the ELPAC progress indicator is only at the "medium" performance level, it is back to baseline level. While inequalities persist in the academic performance of English Learners when compared to the overall population and to non Low-Income students, the former showed significant increases in percentages meeting or exceeding standard in ELA and math in 2022 when compared to the prior year's results. English Learners were also closing performance inequalities in math as shown by this metric. Finally, the reclassification rate increased by 2.4% points from the prior year. These data indicate that, despite continuing inequalities, this action, including professional development, paraprofessional support, and using Imagine Learning as a supplemental program, has had a positive impact on increasing academic outcomes for English Learners who experienced learning loss during the pandemic.

The District recognizes the need to take steps to better address the needs of our English Learners.

Action 1.10 -- All of our students were provided access to a broad course of study, confirming that Action 1.11 was effective.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

In its December 5, 2019 issue, Ed Week presented a "study [that] lends empirical support to the concern that the 'achievement gap' framing may have unintended negative consequences." In consideration of that possibility, for all actions under this goal the term "achievement gap" has been replaced with "inequalities".

Data source for "Desired Outcomes" in ELPAC Summative Assessments: English Learner Progress changed to California School Dashboard to align with the state's accountability system. "Desired Outcomes" for California School Dashboard: ELA and Math Distance from Standard changed based on 2022 CA School Dashboard results. "Year 2" and "Desired Outcomes" for Teachers Appropriately Credentialed with No Mis-assignments or Vacancies changed to reflect new state reporting requirements. Data source for Reclassification Rate for "Year 2" changed to 2021-22 CALPADS Reports 2.16 and 8.1, since the most recent data for that year are not available on DataQuest.

The English Learner progress metric revised to read "Rate of English Learner Students Making Progress toward English Proficiency" to align with statutory language. The State Standards Implementation metric revised to read "Implementation of Standards for All Students and Enabling English Learners to Access CCSS and ELD Standards" to align with statutory language.

In Action 1.4, LCFF budgeted expenditures were increased to invest $700K in long-term licenses for supplemental educational services and supplemental reading materials to support the reading lab. Federal funds budgeted under this action were increased because we have these funds set up for supplemental services for an Opportunities Teacher and increased instructional aide support.

An "additional ELD class at CHS to lower class size and provide greater individual attention" added to Action 1.9.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
2	Maintain a safe and healthy school environment while providing opportunities that develop positive character.

An explanation of why the LEA has developed this goal.

A critical component to student success in learning is a positive school climate that engages students in learning and that encourages regular attendance. Research also shows that positive learning environments can reduce teacher turnover by as much as 25%, a significant factor in providing students with increasingly effective initial instruction.

The Family Engagement Framework, a California Department of Education publication, acknowledges that "family engagement is one of the single most important factors in helping students succeed in school. Parents, families, and other caring adults provide the primary educational environment for children early in life and can reinforce classroom learning throughout the school years."

Significant inequalities are evident in the "Identified Needs" section when comparing Low-Income students, English Learners, Foster Youth, and Students with Exceptional Needs to non-low-income students. The data also show that the latter two groups are also chronically absent at a much higher rate than the overall population. With the resumption of full in-person instruction in 2021-22, suspension rates more than doubled overall and for most student groups. Rates for Low-Income students are higher than overall rates, and more than twice those of non-Low-Income students. English Learners, Students with Exceptional Needs, and Homeless youth all showed increased rates from the prior year.

A positive learning environment, coupled with positive relationships among peers and between students, staff, and families, are critical to students' success. As The Education Trust has noted, " Strong relationships provide a foundation for student engagement, belonging, and, ultimately, learning." The actions described under this goal are all designed to achieve the purposes of maintaining a positive climate and building strong, supportive relationships. The metrics associated with this goal provide the necessary data to monitor and evaluate the effectiveness of those actions.

Measuring and Reporting Results

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24
Attendance rate	Overall attendance 95.73% [2020-21 AERIES District Attendance Calculations]	Overall attendance 93.68% [2021-22 AERIES District Attendance Calculations]	Overall attendance 94.3% [2022-23 AERIES District Attendance Calculations]		Overall attendance 97% [2023-24 AERIES District Attendance Calculations]

Actions

Action #	Title	Description	Total Funds	Contributing
2.1	Parent Engagement	To increase school climate and engagement outcomes for Low Income Students, English Learners, Foster Youth, the District will actively engage parents and families in their children's learning. Family	$406,424.00	Yes

Action #	Title	Description	Total Funds	Contributing
		Liaisons will also help the District to provide services and support to Foster Youth and homeless students.		
		Through the following programs, the district will principally target the engaged and continuous participation of parents of Low Income Students, English Learners, Foster Youth, including those of students with exceptional needs: • Parent Programs • Parent Institute for Quality Education (PIQE) • Parent Workshops/Trainings/Meetings • Family Liaisons The District received a Community Schools planning grant and will hire a Coordinator to engage the families and the community in writing the implementation grant proposal.		
2.2	Maintaining Clean, Safe Facilities	Continue to maintain facilities as per Williams Act requirements and plan for necessary improvements to foster positive school climate.	$6,496,737.00	No
2.3	School Culture and Social Behavior	To support improved outcomes for Low Income Students, English Learners, and Foster Youth in school engagement and school climate, the District will create school environments that welcome and support all of our student populations by: • Hiring and/or retaining staff to provide behavior intervention and support, focused on providing services to Low Income Students, English Learners, and Foster Youth in grades TK-12 who are still feeling the mental and emotional effects of the pandemic. • Increasing students' social-emotional development through teaching, modeling, and practicing social-emotional skills that support a safe and positive climate for learning.	$789,313.00	Yes

Action #	Title	Description	Total Funds	Contributing
		• Providing staff development and collaborative time focused on teaching, modeling, and practicing social-emotional learning (SEL) skills that support a positive climate for learning and work. • Regularly review attendance data to assess if students are on track to be chronically absent. The parents of those who appear to be will be sent a letter noting the absences and consequences of poor attendance. • Establish incentives for attendance. •		
2.4	Transportation for Easier School Access	In order to increase academic outcomes and decrease chronic absenteeism rates for Low Income students and English Learners, groups with high chronic absenteeism rates, the District will provide additional transportation for students who reside inside the "walking zone," an area between a 1.5 and a .5 radius of school. It will provide an additional 61 stops and a reduced walking distance of half a mile from the school site.	$760,758.00	Yes
2.5	Expanded Access to Recreation Spaces	Within the area served by the CUSD, the only safe, clean, and open spaces equipped for outdoor extracurricular and open play areas are the school fields at our elementary and high school. Caruthers and the communities of our feeder schools lack recreational areas where students can participate in physical or athletic activities. Maximizing participation and access to these activities have a direct effect on the positive school climate experienced by Low-Income students. In order to improve student outcomes related to student engagement, school climate, and connectedness for our Low-Income students, the District will expand available athletic fields and recreational areas, for greater access to sports, extra-curricular, and co-curricular activities for Low-Income students at all of our schools.	$262,580.00	Yes

Action #	Title	Description	Total Funds	Contributing
		Engagement in a broad range of co-curricular and extracurricular activities has a direct impact on students' success, as evidenced in multiple research studies. Fredricks and Eccles (2006) found that activity participation can be linked to positive academic outcomes, including improved grades, test scores, more school engagement, and increased educational aspirations. Promoting greater extracurricular participation for our Low-Income students is likely to improve their school connectedness.		

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

Implementation of Action 2.1 was not as successful as we hoped. Though some parent nights were held, we were challenged in connecting with the Parent Institute for Quality Education (PIQE), and did not conduct the number of workshops that we had planned.

Action 2.2 was successfully implemented beyond what was originally planned in order to maintain healthy and positive environments at our schools. Classrooms and common areas were cleaned more frequently, and air filters and ducts, as well, to prevent the spread of illness and ensure the safety of students and staff.

Action 2.3 was a success, as we were able to provide our planned mental/emotional health services. Staff teams met weekly to identify students' social-emotional needs and provide supports. Staffs at both schools were provided presentations in social-emotional learning practices. Both schools reviewed data for chronic absenteeism and instituted additional efforts to lower those rates, especially for students with exceptional needs. Though CHS does not have absenteeism a state accountability measure, we know that students need to be in school to learn, and absenteeism must be addressed at all levels.

Driver shortages and the availability of busses limited the planned implementation of Action 2.4. We were not able to increase the stops to the 61 that we expected.

Action 2.5 was successfully begun, as the District began expansion of available athletic fields and recreational areas, for greater access to sports, extra-curricular, and co-curricular activities.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 2.1 -- Under Budgeted: The District spent more than planned due to the costs of home liaisons being more expensive than anticipated.

Action 2.2 -- Under Budgeted: The District spent more than planned due to adding a state approved, federally-funded project that was not originally anticipated.

Action 2.3 -- Over Budgeted: The District spent less than planned because a position originally planned to be charged to this action was coded to Goal 1, Action 5.

Action 2.4 -- Over Budgeted: he District spent less than planned because the costs for home to school bussing were less than anticipated due to a change in the accounting function coding.

An explanation of how effective the specific actions were in making progress toward the goal.

Action 2.1 -- While the action was not implemented to the expected degree, feedback from parents and families indicate that our efforts to re-engage with them after the pandemic is being effective. Several parents gave high marks to our schools for staff communication, approachability, and accessibility, including the information and assistance provided by the Family Liaisons. Over 90% of parents responding to surveys participated in conferences; a third attended the schools' Parent Nights to learn more about supporting their children academically. Parents who participated in PIQE appreciated the opportunity to learn more about supporting their children at home and advocating for their children at school an din the community. Based on Spring, 2023 survey results, the percentage of parents who responded that they feel welcome at their children's schools also showed a gratifying increase, from 81.3% to 92.0%. The percentage of parents who feel their children are safe at school also increased by double digits from 73.7% to 88.0%. Results for the Family Engagement instrument showed an improved rating of 4.1 (on a scale of 1 to 5) for family engagement responses.

Action 2.2 -- This action was effective, as all schools had a FIT rating of "good" or better. Ninety-six percent of parents surveyed agreed that the schools are clean and well-maintained.

Action 2.3 and Action 2.5 -- We were very pleased to see that the social-emotional supports and positive behavior system put in place seem to be having a positive impact, as the percentage of students who responded to the survey prompt that they feel safe at school increased from 60.6% in 2022, to 85.8% in 2023. The percentage of respondents who agreed that they feel connected to their school rose from 57.1% to 80.6%. Staff report that the expanded fields allow increased outdoor activities during the regular school day and after school, and are heavily used by students. the percentage of students who report positive feelings about their play grounds and appearance increased from 29% in 2022 to 65% in 2023. Additionally, three-quarters of students agreed that "I am happy to be at my school." The percentages of teachers who feel safe at school and feel connected were both 100%. However, these actions were not as effective as planned on maintaining low suspension rates. With the resumption of full in-person instruction in 2021-22, suspension rates more than doubled overall and for most student groups. Rates for Low-Income students are higher than overall rates, and more than twice those of non-Low-Income

students. English Learners, Students with Exceptional Needs, and Homeless youth all showed increased rates from the prior year. The District attendance rate increased by .6%, which we believe is a result of both the greater social-emotional supports that helped students feel more connected to school, and the expanded fields that made schools happier and m ore enjoyable places to be.

Action 2.4 -- We were not able to implement this action has planned, so the intended effect was not realized and cannot be evaluated. Data suggests that there is still a need for implementation. Chronic absenteeism rates continued to increase from the prior year and the baseline year. Significant inequalities are evident when comparing Low-Income students, English Learners, Foster Youth, and Students with Exceptional Needs to non-low-income students. The data also show that the latter two groups are also chronically absent at a much higher rate than the overall population.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Data sources for "Year 2" metrics and "Desired Outcomes" in Chronic Absenteeism and Suspension Rate changed to California School Dashboard to align with the state's accountability system. Foster Youth and Homeless added to "Desired Outcome" in suspension rate as those numbers have increased sufficiently to be assigned performance levels. Wording in the "Desired Outcome" for School Climate Survey: Teachers changed from "welcome at" to "connected to" in order to correct a typographical error.

"The District received a Community Schools planning grant and will hire a Coordinator to engage the families and the community in writing the implementation grant proposal" added to action 2.1, which also resulted in a significant increase in the total funds budgeted for this action.

The District has significantly increased the budget for Action 2.2 in order to complete several deferred maintenance projects.

As a result of input from educational partners, the following additions were made to Action 2.3 -- "Regularly review attendance data to assess if students are on track to be chronically absent. The parents of those who appear to be will be sent a letter noting the absences and consequences of poor attendance. Establish incentives for attendance."

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
3	Guide and prepare all students, including low-income, English learners, and foster youth students, for post-secondary opportunities.

An explanation of why the LEA has developed this goal.
While we are pleased with increased percentages of graduation rates and A-G completion rates that showed gaps closing, inequalities remain between rates for English Learners and the overall population. There are also significant inequalities between EL and Low-Income students and non Low-Income students. The "identified Needs " section included data demonstrating inequalities in percentages of 11th grade students scoring "Ready" in the EAP (exceeding standard on SBAC) between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Also clearly seen are inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas. Studies completed by the Alliance for Excellent Education found that a U.S. 90% high school graduation rate would result in 250,000 additional graduates, $3.1 billion in increased income, $664 million in tax revenues, $16.1 billion in health care savings, $5.7 billion in economic growth, and more than 14,000 new jobs. In short, the positive impacts are enormous for Caruthers USD students who successfully complete high school prepared for college and career. The actions described under this goal are all designed to achieve high rates of high school graduation and planning for post-secondary success. The metrics associated with this goal provide the necessary data to monitor and evaluate the effectiveness of those actions.

Actions

Action #	Title	Description	Total Funds	Contributing
3.1	College & Career and Post-Secondary Education	To increase academic achievement, school engagement, and outcomes on local metrics for students, and decrease inequalities in performance results between Low Income Students, English Learners, and Foster Youth and higher-performing student groups, the District will provide: • Increased access to counseling services for Low Income Students, English Learners, and Foster Youth at the high school • Increased academic guidance and academic opportunities to participate in a broad course of study in preparation for post-secondary eligibility to better meet the needs of Low Income Students, English Learners, and Foster Youth. • Monitoring of Low Income Students, English Learners, Foster Youth progress in meeting post-secondary eligibility, utilizing various data systems to review graduation requirements, A-G	$2,065,314.00	Yes

Action #	Title	Description	Total Funds	Contributing
		and CTE completion, and enrolled in courses necessary to apply to four-year universities, prepare for enrollment in a community college, and/or prepared to successfully enter the military or workforce after graduation. • Provide American Sign Language as a CTE class to increase the employability of our Low-Income students post graduation. • College and career field trips for Low Income Students, English Learners, and Foster Youth in grades 7th-12th • FASFA and Dream Act workshops for Low Income Students, English Learners, and Foster Youth • College prep workshops for Low Income Students, English Learners, and Foster Youth • Recruiting Low-Income students, English Learners, Foster Youth, and homeless students for AP classes • PSAT fees • A CTE/ROP Coordinator to support Low Income Students, English Learners, and Foster Youth in completing pathways • A High School Migrant Counselor who assists parents with EL and Low-Income Migrant program activities, recruit for migrant conferences and events • Low Income Students, English Learners, and Foster Youth Parents' conferences regarding: student academic progress, post-secondary plans, and personal needs • Continued implementation of a plan for student tutors to support Low Income Students, English Learners, and Foster Youth •		

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

This action was implemented as planned. Senior English Learners were provided additional time with counselors to address planning for post-secondary success.

We were successful in providing increased access to counseling services at the high school. The increased academic guidance and academic opportunities to participate in a broad course of study in preparation for postsecondary eligibility to better meet the needs of low income and EL pupils combined with monitoring of students' progress in meeting post-secondary eligibility was successful as the student groups large enough to report data showed double digit increases in the percentages that graduated with a confirmed plans of enrollment in college, university, vocational program, or military.

Transportation issues presented a challenge, limiting the number of college field trips that we were able to offer. FASFA and Dream Act workshops were held, as were college prep workshops for Low-Income students, English Learners, and Foster Youth. Recruiting Low-Income students, English Learners, Foster Youth, and homeless students for AP classes took place, resulting in the highest number of students in CHS history taking AP exams. The District paid the PSAT fees for Low-Income students, English Learners, and Foster Youth who took the exam. The CTE/ROP Coordinator was successfully continued. Parent conferences for Low-Income students, English Learners, Foster Youth regarding student academic progress, post-secondary plans, and personal needs were also successful, again as shown in the percentages of students graduating with post-secondary plans. Student tutors supported Low Income Students, English Learners, and Foster Youth. The Migrant counselor provided important information sessions and counseling for Migrant and English Learner students and their parents on navigating college enrollment and accessing resources such as DACA information for post-secondary preparation. The ASL class was not implemented, as the District was challenged in finding a part-time teacher for the class. We will continue trying to do so.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Under budgeted -- Despite not providing all of the field trips as expected, nor hiring a part-time ASL teacher, the District spent more than budgeted on providing additional counseling services.

An explanation of how effective the specific actions were in making progress toward the goal.

Action 1:
The metrics used to assess the effectiveness of this action show a mixed bag of results, suggesting that it has been somewhat effective, but not to the degree expected or in all areas. For graduating seniors, it continues to be effective in future planning and an orientation on post-secondary success. Overall and for Hispanic and Low-Income students, the results continue to exceed the desired outcome, and over 90% will have confirmed plans of enrollment in one of the following: college, university, vocational program, or military. We were pleased that, overall and for small groups, there were slight increases from the prior year. Happily, the rate for English Learners increased by more than 12% points, further closing that inequality and indicating that our English Learners are poised for continued success. Accompanying the improved results for grad rates was that, overall and for the Low-income student group, there were large increases in the percentages of students in the 2022 graduation cohort meeting the requirements for admission to U.C. or C.S.U. -- up by 16.6% points and 17% points, respectively. English Learners saw a modest increase (.5%) in students meeting those admission requirements. These data point to the effectiveness of college prep workshops and increased access to academic guidance and counseling services.

EAP results were not so positive. Inequalities in percentages of 11th grade students scoring "Ready" in the EAP (exceeding standard on SBAC) were clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Also clearly seen were the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

The CTE completion rates overall and for student groups declined significantly, with the exception of English Learners, who stayed with two percent of the prior year's rate. Enrollment in CTE capstone classes was also significantly down from the prior year, as students appeared to focus more on completion of A-G requirements, which, as noted above, were sharply above the preceding year. This decline in CTE completion appears to have impacted the combined CTE/A-G completion rate, which was down slightly. We continue to exceed our desired outcome for CTE, and are making positive strides in reaching our desired outcome for A-G completion. We recognize the need to better utilizing our data systems to review graduation requirements, A-G, and CTE completion progress for our CHS Low-Income students, English Learners, and Foster Youth, and to have the CTE/ROP Coordinator communicate to them that A-G and CTE completion are not exclusive.

The significant increase in the percentage of students scoring 3 or above on AP exams, and the highest number of students in CHS history taking them, indicates that the increased academic guidance, A-G completion monitoring, recruiting Low-Income students, English Learners, Foster Youth, and homeless students, and student tutors.

For English Learners, the increase in the graduation rate was excellent news. That, in conjunction with the maintenance of CTE completion rates, suggest that the monitoring of English Learners meeting graduation requirements and CTE completion is being effective, as are increased academic guidance and academic opportunities to participate in a broad course of study However, in meeting U.C. or C.S.U. admission requirements, English Learners are 26% points behind the graduation cohort at large. EAP data also shows that our English Learners are not experiencing the same lessening in inequalities that are occurring for Low-Income students when compared to the overall student population. The District recognizes the need to take steps to better address the needs of our English Learners for academic success; many of those are described in Action 1.9 of this plan. An additional ELD class at CHS to lower class size and provide greater individual attention was added to Action 1.9 to address the need. More effective implementation of college and career field trips, FASFA and Dream Act workshops, and college prep workshops for English Learners is a priority in creating a "college-going" mindset for those students.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

In its December 5, 2019 issue, Ed Week presented a "study [that] lends empirical support to the concern that the 'achievement gap' framing may have unintended negative consequences." In consideration of that possibility, for all actions under this goal the term "achievement gap" has been replaced with "inequalities".

The data source for the Combined A-G and CTE Completion Rate metric changed from "2023-24 CALPADS EOY Reports 8.1 and 3.15" to "2023-24 Dashboard Additional Report" to align with prior years' source.

Desired Outcome for "Graduating seniors will have confirmed plans of enrollment in one of the following: college, university, vocational program, or military" changed to reflect recent data.

Data year was removed from the "Desired Outcome" column for AP, CCI, EAP ELA and Math, and Graduation Cohort CTE Pathway Completion Rate in order to align with prior practice.

Action 3.1, "develop and implement a plan for student tutors" revised to "continued implementation" to reflect updated practice.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students [2023-24]

Projected LCFF Supplemental and/or Concentration Grants	Projected Additional LCFF Concentration Grant (15 percent)
6,636,687	$842,771

Required Percentage to Increase or Improve Services for the LCAP Year

Projected Percentage to Increase or Improve Services for the Coming School Year	LCFF Carryover — Percentage	LCFF Carryover — Dollar	Total Percentage to Increase or Improve Services for the Coming School Year
39.23%	0.48%	$76,304.02	39.71%

The Budgeted Expenditures for Actions identified as Contributing may be found in the Contributing Actions Table.

Required Descriptions

For each action being provided to an entire school, or across the entire school district or county office of education (COE), an explanation of (1) how the needs of foster youth, English learners, and low-income students were considered first, and (2) how these actions are effective in meeting the goals for these students.

With the exception of Action 1.9, all other actions included in the Local Control and Accountability Plan and marked as contributing to the increased or improved services requirement for Foster Youth, English Learners, and Low-Income students are being provided on an LEA-wide basis and are consistent with 5 CCR Section 15496(b). As described in the instructions to the 2021-24 LCAP, these actions are principally directed towards and effective in meeting the LEA's goals for unduplicated students when the LEA explains how:

- It considers the needs, conditions, or circumstances of its unduplicated pupils;
- The action, or aspect(s) of the action (including, for example, its design, content, methods, or location), is based on these considerations; and
- The action is intended to help achieve an expected measurable outcome of the associated goal.

Input from educational partners was also a significant consideration in determining students' needs, actions, and potential effectiveness. Indicators for Low-Income students, English Learners, and Foster Youth are monitored and reported internally and with educational partners to ensure the focus and determination of effectiveness remains centered on outcomes for these students.

Goal 1: Promote academic achievement for all students, including low-income, English learners, and foster youth students.

Action 1.2 --

Needs, Conditions, or Circumstances:

"Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we cannot disaggregate the "Distance from Standard' data for non-Low-Income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for Low-Income students, English Learners, and Students with Exceptional Needs.

The action, or aspect(s) of the action, based on these considerations:

District instructional staff will participate in targeted professional development to improve practice that uses student data to make instructional decisions, and enhances the available strategies that teachers have to promote learning forLow-Income students, English Learners, and Foster Youth in order to support academic gains and to decrease inequalities in performance results on state and local assessments. Teachers and instructional aides will be engaged in relevant and timely learning opportunities, including workshops, demonstration lessons, and coaching, that support the design and delivery of lessons based on state adopted frameworks, standards, and best instructional practices. All lessons will meet the rigor of the California State Standards and subject matter frameworks.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Ongoing, high-quality professional development for teachers, instructional aides, and site and district administrators, is expected to have a significant impact on the academic and other outcomes for Low-Income students, English Learners, and Foster Youth. Professional learning activities that have been identified through survey input and that are evidence based, followed by peer coaching and collaboration, will be essential in enhancing our teachers' self-efficacy, an educator's belief in his or her ability to impact student learning that is one of the most powerful determiners of student success (Hattie, 2008). The District will provide professional development and support that builds each teacher's self-efficacy. We know that our English Learners and Low-Income students need strong first instruction accompanied by

differentiated supports and interventions that come from increasing our teachers' efficacy. We expect to see increases in teacher efficacy and improved academic results.

Action 1.3 –

Needs, Conditions, or Circumstances:

"Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we cannot disaggregate the "Distance from Standard' data for non-Low-Income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for Low-Income students, English Learners, and Students with Exceptional Needs.

A more systematic approach in analyzing data remains a need. Implementation of the data systems and analyzing data from supplemental materials to assess the effectiveness of various supplemental programs in decreasing inequalities between Low-Income students, English Learners, and Foster Youth and their non-Low Income peers and the overall population remains a work-in-progress. Staffs have not had the anticipated planning time due to a lack of subs to allow teacher release time.

The action, or aspect(s) of the action, based on these considerations:

The District will provide the following data sources -- Illuminate Data, benchmarks, and self-assessments/rubrics -- for ongoing assessment of students' progress and to inform instructional decision-making focused on supporting Low-Income students, English Learners, and Foster Youth.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

The data cited above clearly show there are significant inequalities in outcomes between student groups in our District. Even after Low-Income students, English Learners, and Foster Youth have received appropriate interventions, it is possible that, while "some well-designed and implemented cognitive, social and emotional interventions produce immediate impacts on child and adolescent outcomes. Sharp

reductions in subsequent intervention effects are typically observed …" (Bailey, et. al., 2018). Data also show that the impact has been most felt by our low-income students. In order for interventions and supports to sustain effectiveness, we need to be able to create targeted assessments and access meaningful data. A basic tenet of Improvement science (Learning to Improve, Bryk, et. al., 2015) is the necessity of examining data regularly to determine if our interventions are working, and to adjust as the data indicate. Administrators and instructional coaches will assist teachers in determining, by examining research and results, which interventions are having positive impacts and how they might be best implemented. We expect that by having reliable, useable data sources, we will target instruction for Low-Income students, English Learners, and Foster Youth to get increased academic outcomes in the metrics associated with Goal 1.

Action 1.4 –

Needs, Conditions, or Circumstances:

 "Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we cannot disaggregate the "Distance from Standard' data for non-Low-Income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas. We know from teacher feedback and an analysis of local needs that Foster Youth often experience the same inequalities as Low-Income students.

 As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for Low-Income students, English Learners, and Students with Exceptional Needs.

 A more systematic approach in analyzing data remains a need. Implementation of the data systems and analyzing data from supplemental materials to assess the effectiveness of various supplemental programs in decreasing inequalities between Low-Income students, English Learners, and Foster Youth and their non-Low Income peers and the overall population remains a work-in-progress. Staffs have not had the anticipated planning time due to a lack of subs to allow teacher release time.

The action, or aspect(s) of the action, based on these considerations:

 The District will purchase and use specific reading materials that will support accelerated reading improvement for those students. The District will make decisions based on evidence. The materials and implementation strategies may include:

- Instructional Programs that are Supplemental to Core
- Supplemental English Language Arts Support Curricula
- iReady Math and Reading
- Technology to Implement Supplemental Curricula
- Staff and supplementary materials to conduct a District Reading Lab that provides intensive intervention and support for Low-Income students, English Learners, and Foster Youth who are struggling in reading, including increased instructional aide support.
- Guided Reading Materials that are supplemental to the core reading program.
- Continue an Opportunities Class teacher to conduct classes that will address learning loss on a more individual basis.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

The Curriculum Associates Research team found that "Students who are English Learners (EL), students with disabilities (SWD), and students with socioeconomic disadvantages (SED) using i-Ready Personalized Instruction all saw statistically significantly greater growth than students from the same subgroups who did not have access to the program during the 2017–2018 school year." We expect the continued implementation of iReady to increase student achievement in ELA and math, especially for our high-needs students. The District Reading Lab for struggling readers will continue. Hattie's research (2008) showed an effect size of .77 for comprehensive interventions. An effect size of .40 is considered to be significant in its positive impact on learning. We know that Hattie (2008) found effect sizes of .58 for reading comprehension programs; .60 for phonics programs; and .67 for both vocabulary programs and repeated reading programs. The "What Works Clearinghouse" found repeated reading has shown increased achievement in reading comprehension. Armed with this and additional information, the District will invest in materials that have shown evidence of success with our neediest students. Fountas and Pinnell (2001) state that readers need to be able to apply and modify strategies depending on the purpose of the text. They suggest that guided reading sessions, involving explicit teaching and modelling of a broad range of strategies to suit familiar and new text types, supports reading development. They add that, "through guided reading you can demonstrate how a reader constructs meaning from text, makes personal connections with text, and goes beyond text. You can provide specific support for readers as they delve into texts for themselves, meeting challenges by using a range of skills". Consequently, we anticipate improved outcomes in SBAC ELA and Math assessments for our Low-Income students, English Learners, and Foster Youth.

Action 1.5 –

Needs, Conditions, or Circumstances:

"Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we cannot disaggregate

the "Distance from Standard' data for non-Low-Income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for Low-Income students, English Learners, and Students with Exceptional Needs.

A more systematic approach in analyzing data remains a need. Implementation of the data systems and analyzing data from supplemental materials to assess the effectiveness of various supplemental programs in decreasing inequalities between Low-Income students, English Learners, and Foster Youth and their non-Low Income peers and the overall population remains a work-in-progress. Staffs have not had the anticipated planning time due to a lack of subs to allow teacher release time.

The action, or aspect(s) of the action, based on these considerations:

In order to maintain and build effective site leadership that leads to increased academic outcomes for students and decreased inequalities in performance results between Low-Income students, English Learners, Foster Youth and the higher-performing student groups, the District will support site leadership teams with:

- Coaching, extra time, and professional learning activities for School Leadership Teams

- Coaching, extra time, and professional learning activities for instructional planning, design, and support

How the action is intended to help achieve an expected measurable outcome of the associated goal:

School effectiveness research supports the need for school leaders to exhibit strong instructional leadership, especially in supporting teachers in developing the individual self-efficacy that combines into collective self-efficacy. A report from the Wallace Foundation (2004) found that "Leadership is second only to classroom instruction among all school-related factors that contribute to what students learn at school." [https://www.wallacefoundation.org/knowledge-center/documents/how-leadership-influences-student-learning.pdf]. We know that our English Learners and Low-Income students need strong first instruction accompanied by differentiated supports and interventions that come from increasing our teachers' efficacy. We expect that by enhancing leadership abilities among administrators and staff, we will see increases in teacher efficacy and improved academic results.

Action 1.8 –

Needs, Conditions, or Circumstances:

"Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we cannot disaggregate the "Distance from Standard' data for non-Low-Income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of Low-Income students, English Learners, and Students with Exceptional Needs when compared to the overall population and to non Low-Income students, the former three groups all showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for Low-Income students, English Learners, and Students with Exceptional Needs.

A more systematic approach in analyzing data remains a need. Implementation of the data systems and analyzing data from supplemental materials to assess the effectiveness of various supplemental programs in decreasing inequalities between Low-Income students, English Learners, and Foster Youth and their non-Low Income peers and the overall population remains a work-in-progress. Staffs have not had the anticipated planning time due to a lack of subs to allow teacher release time.

The action, or aspect(s) of the action, based on these considerations:

The District will provide extended learning programs for learning recovery, acceleration, enrichment, English language development, credit recovery, and original credit classes for grades TK-12. that include:

Before and/or After School extended learning sessions

Tutoring

Summer School

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Across grades K–12, increased learning time programs had a small but statistically significant positive effect on students' academic motivation (defined as school attendance, homework completion, teachers' assessments of students' work effort in class, and students' self-reports of their motivation to learn), compared with similar students who did not participate in the programs." [Kidron and Lindsay, 2014]. Expanded learning time after-school, after-school tutoring, and in summer school provides extended time for teachers to work with students on basic literacy and mathematics skills. English learners will receive additional English language development opportunities. Enrichment classes will build background knowledge that is necessary for building vocabulary and increasing reading and writing achievement.

By providing expanded teaching and learning time, including summer school and before- and after-school programs that address English language development, ELA, and math, we expect to accelerate improved academic outcomes for our Low-Income students, English Learners, and Foster Youth, as measured by state and local assessments.

Action 1.9 –

Needs, Conditions, or Circumstances:

"Distance from Standard" results show that inequalities persist in the achievement of English Learners when compared to the overall student achievement. They experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between English Learners and overall results in both subject areas.

As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of English Learners when compared to the overall population and to non Low-Income students, the former showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for English Learners.

In addition to the data cited above, English Learners meeting U.C. or C.S.U. admission requirements are 26% points behind the graduation cohort at large. English Language Proficiency Assessment for California (ELPAC) Summative results show that less than half (45.6%) of our English Learners are making a year or more growth in acquiring English language skills. The District recognizes the need to take steps to better address the needs of our English Learners.

The action, or aspect(s) of the action, based on these considerations:

The District will provide teachers with professional development in ELD strategies that increasing English Learner students' access to the core and accelerate English Learner students' acquisition of English; provide English Language Development enrichment and support materials that accelerate English acquisition and increase access to the core; provide increased paraprofessional support for small groups and individuals; provide an additional ELD class at CHS to lower class size and provide greater individual attention; continue implementation of its English Learner Master Plan aligned with the English Learner Roadmap. Included in that plan are practices that will more closely monitor the progress of EL students and RFEP students, and immediately adjust instruction as warranted by data and students' needs.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Supplemental materials and supports for English Learners will accelerate language acquisition through the use of evidence-based programs and training in language acquisition strategies. Paraprofessionals to support small group practice will also aid language acquisition. Feedback and acceleration in a small group setting is expected to have an effect size on improvement of almost twice (.76) the threshold for

gains (.40). Culturally-responsive practices and a focus on literacy supports will also accelerate language acquisition. We expect that providing support, as needed, to Redesignated English Learner students who experience academic difficulties subsequent to redesignation will help those students maintain academic success.

Action 1.10 –

Needs, Conditions, or Circumstances:

"Distance from Standard" results show that inequalities persist in the achievement of Low-Income students and English Learners when compared to the overall student achievement. Both those groups experienced greater declines than their peers overall. Inequalities in percentages of students meeting or exceeding standard are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Though we cannot disaggregate the "Distance from Standard' data for non-Low-Income, we can infer with confidence that a similarly significant inequality exists in that metric. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

As shown in the data in the "Identified Need" section of this plan, while inequalities exist in the academic performance of English Learners when compared to the overall population and to non Low-Income students, the former showed significant increases in percentages meeting or exceeding standard in ELA and math when compared to the prior year's results. English learners were also closing performance inequalities in math as shown by this metric. These data indicate that, despite continuing inequalities, the action below has been effective in increasing academic outcomes for English Learners.

The action, or aspect(s) of the action, based on these considerations:

The District will maintain smaller class sizes in 4th through 12th grades.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Teachers will be retained to maintain smaller class sizes, including an additional math teacher to reduce class sizes at Caruthers High School, providing increased support for Low-Income students, English Learners, and Foster Youth. Glass and Smith concluded in their 1979 study of the impact of class size on student achievement that "A clear and strong relationship between class size and achievement has emerged...There is little doubt, that other things being equal, more is learned in smaller classes." [https://tinyurl.com/Class-Size-Study]. Based on research, having smaller class sizes with extra support in math to support acceleration is expected to increase learning outcomes for unduplicated students who are struggling. Feedback and acceleration in a small group setting is expected to have an effect size on improvement of almost twice (.76) the threshold for gains. Lower class sizes will help address the identified needs of Low-Income students, English Learners, and Foster Youth because it will allow for increased quality instructional interactions between student and teacher and increased time for small group and individual instruction/support that is needed to reduce the number of students not achieving mastery.

Additionally, staff educational partners have identified the need for providing increased collaboration time at CES to better address the identified academic inequalities for Low-Income students, English Learners, and Foster Youth. At the high school level, subject-matter writing in PE regarding healthy social-emotional skills has been identified as a strategy to support reducing inequalities in EAP results for Low-Income students and English Learners. Adding an additional PE teacher will allow rescheduling meeting times at CES to allow more teacher collaboration, and will provide smaller class sizes at the high school to facilitate adding the writing instruction and providing students with more individualized support.

iReady data will be disaggregated for those students, and we expect to see improved results in those assessments, leading to increased achievement on state SBAC assessments.

Goal 2: Maintain a safe and healthy school environment while providing opportunities that develop positive character:

Action 2.1 --

Chronic absenteeism rates continued to increase from the prior year and the baseline year. Significant inequalities are evident when comparing Low-Income students, English Learners, Foster Youth, and Students with Exceptional Needs to non-low-income students. The data also show that the latter two groups are also chronically absent at a much higher rate than the overall population.

Additionally, the percentage of parents who responded that they feel welcome at their children's schools also showed a gratifying increase, from 81.3% to 92.0%. The percentage of parents who feel their children are safe at school also increased by double digits from 73.7 to 88.0%. Significant increases in those percentages and the percentages of Low-Income students responding that they feel safe and school and feel connected to school indicate that this action has been effective in increasing those feelings.

While the dropout rate (2.7%) reflects the small size of the cohort, the District is committed to all students completing high school.

The actions, or aspect(s) of the actions, based on these considerations:

The district will actively engage parents and families of Low-Income students, English Learners, and Foster Youth in their children's learning. Through the following programs, the District will principally target the engaged and continuous participation of parents of those students, including families of students with exceptional needs:

- Parent Programs
- Parent Institute for Quality Education (PIQE)
- Parent Workshops/Trainings/Meetings

- Family Liaisons

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Goal 2, Action 1 -- The Family Liaisons will have a primary focus of engaging families of Low-Income students, English Learners, and Foster Youth in their children's education. Additionally, enhancing the welcome families feel at schools, along with providing translation services at events will increase family engagement. Parent workshops and trainings, including PIQE, will empower parents and guardians to be fully involved in the decisions regarding their child's education, by providing them with concrete strategies to advocate for their children, and will also increase family engagement. Family Liaisons will also help the District to provide services and support to Foster Youth and homeless students. Another significant benefit is described in the Family Engagement Framework, a California Department of Education publication, that acknowledges that "family engagement is one of the single most important factors in helping students succeed in school. Parents, families, and other caring adults provide the primary educational environment for children early in life and can reinforce classroom learning throughout the school years."

Based on this evidence we expect increased family engagement to result in improved student attendance outcomes, increase feelings of school connectedness, and reductions in chronic absenteeism and the high school dropout rate.

Action 2.3 --

Needs, Conditions, or Circumstances:

Chronic absenteeism rates continued to increase from the prior year and the baseline year. Significant inequalities are evident when comparing Low-Income students, English Learners, Foster Youth, and Students with Exceptional Needs to non-low-income students. The data also show that the latter two groups are also chronically absent at a much higher rate than the overall population. With the resumption of full in-person instruction in 2021-22, suspension rates more than doubled overall and for most student groups. Rates for Low-Income students are higher than overall rates, and more than twice those of non-Low-Income students. English Learners, Students with Exceptional Needs, and Homeless youth all showed increased rates from the prior year.

Spending almost two years in virtual and/or part-time instructional settings had a significant impact on students' behaviors and abilities to interact with others. Educational partners have noted that many students at all grade levels needed to "relearn" appropriate in-school behaviors as they exhibited more relaxed behaviors such as they might at home. This need to "relearn" extended to interactions with peers. Partners have also expressed concerns that motivation appeared to be lacking among many older students at the middle and high school levels.

Educational partner input, and anecdotal information since the return to school highlight the need to provide students with social-emotional supports. Significant increases in those percentages and the percentages of Low-Income students responding that they feel safe and school and feel connected to school indicate that this action has been effective in increasing those feelings.

The actions, or aspect(s) of the actions, based on these considerations:

District will create school environments that welcome and support our Low-Income students, English Learners, and Foster Youth populations by:

- Hiring and/or retaining staff to provide behavior intervention and support, focused on providing services to Low Income Students, English Learners, and Foster Youth in grades TK-12 who are still feeling the mental and emotional effects of the pandemic.

- Increasing social-emotional development through teaching, modeling, and practicing social-emotional skills that support a safe and positive climate for learning that will encourage improved attendance for Low-Income students, English Learners, and Foster Youth.

- Providing staff development and collaborative time focused on teaching, modeling, and practicing social-emotional learning (SEL) skills that support a positive climate for learning and work fro Low-Income students, English Learners, and Foster Youth.

- School site staffs will regularly review attendance data to assess if students are on track to be chronically absent. The parents of those who appear to be will be sent a letter noting the absences and consequences of poor attendance.

- Schools will establish local attendance incentive programs.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Significant increases in the percentages of Low-Income students responding that they feel safe and school and feel connected to school indicate that this action has been effective in increasing those feelings. The need to address those feelings remains a priority for the District. Research shows that Social Emotional Learning activities not only improve achievement by an average of 11 percentile points, but it also increase prosocial behaviors (such as kindness, sharing, and empathy), improve student attitudes toward school, and reduce depression and stress among students (Durlak et al., 2011) [https://www.edutopia.org/blog/why-sel-essential-for-students-weissberg-durlak-domitrovich-gullotta]. Our experience as educators confirms that students who experience prosocial behaviors help establish positive relationships, which, in turn, cause students to feel safer and more connected to school. Safe, caring, participatory, and responsive school climates tend to foster a greater attachment to school and provide the optimal foundation for social, emotional, and academic learning for middle school and high school students (Blum, McNeely, & Rinehart, 2002). Students who feel increased school connectedness are less likely to be chronically absent. Increased attendance rates will also have a positive impact on graduation rates, as Low-Income students, English Learners, and Foster Youth need to be in school to increase the likelihood of their graduating.

With the implementation of SEL and the additional supports we expect to see increased connectedness to school, increased feelings of safety, declines in chronic absenteeism, decreases in suspension rates, increases in attendance rates, and increases in graduation rates for our Low-Income students, and Foster Youth, including those with exceptional needs, as a result of the programs implemented in this action.

Action 2.4 –

Needs, Conditions, or Circumstances:

Student and parent educational partners have indicated that, for low-income students, transportation to and from school on inclement days is often not possible from family members, and students are often placed in possibly dangerous situations walking in some less-developed areas. Their attendance and engagement are impacted by the lack of available, reliable transportation. Chronic absenteeism rates continued to increase from the prior year and the baseline year. Significant inequalities are evident when comparing Low-Income students, English Learners, Foster Youth, and Students with Exceptional Needs to non-low-income students. The data also show that the latter two groups are also chronically absent at a much higher rate than the overall population.

The actions, or aspect(s) of the actions, based on these considerations:

Goal 2, Action 4 – CUSD will provide an increased Transportation Program consisting of an additional 61 stops and a reduced walking distance of half a mile from the school site.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

By providing Low-Income students, English Learners, and Foster Youth with safe, reliable transportation to and from school and ensuring they can arrive without spending an excessive amount of time on the bus, we will be giving them the opportunity to be at school daily and stay for the entire school day, which would increase their instructional time in their classes. It will also do more to ensure that they have sufficient time to complete their homework, engage in family activities, and get plenty of sleep. As a result, we expect to increase attendance rates, and reduce chronic absenteeism. This is also expected to increase feelings of school connectedness and result in higher academic achievement.

Action 2.5 --

Needs, Conditions, or Circumstances:

It is evident that our educational partners feel it's important to focus on providing opportunities for our students to engage in play and exercise in school to maintain healthy lifestyles and maximize their potential. In the District's most recent survey, "Healthy Lifestyle" was selected as an area of focus by almost one-half of parents who responded. Since the beginning of the expansion of athletic field and

recreational areas, the percentage of students who responded to surveys that they were satisfied with the conditions of their school grounds has jumped from 33% in 2022 to 69% in 2023, clearly indicating that this action has had the anticipated positive outcome.

Our low-income students have lacked access to the benefits of being active in physical education and, at the high school level, co-curricular and extracurricular activities often offered in neighboring towns which require the means to travel. The small size of our District has limited the resources we have to provide more play space and more activities. Our resources have constrained the opportunities we are able to offer. Expansion of available field space and equipment would allow us to make these opportunities available to our Low-Income students whose families cannot afford to travel out-of-town to join those programs.

Within the area served by the CUSD, the only safe, clean, and open spaces equipped for outdoor physical education, extracurricular, and open play areas are the school fields at our elementary and high school. Caruthers and the communities of our feeder schools lack recreational areas where students can participate in physical or athletic activities. Maximizing participation and access to these activities have a direct effect on the positive school climate experienced by Low-Income students.

Our Low-Income students have low participation and engagement in play due to often-limited access denying them the social-emotional and cognitive benefits. "In addition to sparking cognitive skills, experts also suggest that play can help children cope with the trauma of growing up during a pandemic. Leading pediatric experts recently declared a national emergency in children's mental health and the Surgeon General has called for a swift response to the deepening crisis among youth today...However, access to play and exercise is not equal. One recent study showed that low-income kindergartners often get less physical activity than their higher-income peers. Such disparities may only deepen achievement gaps." **

2021-22 CAASPP Science assessments showed that our Low-Income students were making progress in closing inequalities in science assessment results, gaining 2% points on Overall results. (12.0% v. 12.9%, respectively). For English Learners, the inequality has slightly widened (1.3% v. 12.9%). Both of those groups remain far behind non Low-Income students, who scored at 20% meeting or exceeding standard in the science assessment.

Outdoor spaces for project-based STEAM learning that can be delivered in smaller groups to better address the academic needs of our Low-Income students and English Learners would contribute to decreasing these inequalities in performance results.

Significant increases in those percentages and the percentages of Low-Income students responding that they feel safe and school and feel connected to school indicate that this action has been effective in increasing those feelings.

The actions, or aspect(s) of the actions, based on these considerations:

In order to improve student outcomes related to student engagement, school climate, and connectedness for our Low-Income students, the District will expand available athletic fields and recreational areas, for greater access to sports, extra-curricular, and co-curricular activities for Low-Income students at all of our schools.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Engagement in a broad range of physical education and co-curricular and extracurricular activities has a direct impact on students' success, as evidenced in multiple research studies. Promoting greater extracurricular participation for our Low-Income students is likely to improve their and academic outcomes. CUSD is addressing the limited access to outdoor play areas/fields and access to extracurricular activities by expanding playfields, sports fields, through improvements that will increase access. Providing these spaces will increase students' feelings of connectedness and school engagement, which will also lead to higher academic performance on state assessments.

Goal 3: Guide and prepare all students, including Low-Income, English Learners, and Foster Youth students, for post-secondary opportunities.

Action 3.1: Needs, Conditions, or Circumstances:

Inequalities in percentages of 11th grade students scoring "Ready" in the EAP (exceeding standard on SBAC) are clearly apparent between Low-Income students and non-low-income students in both ELA and math, evidence that compounds the difference between Low-Income and overall percentages. Also clearly seen are the inequalities between English Learners, Students with Exceptional Needs and overall results in both subject areas.

In addition to the data cited above, English Learners meeting U.C. or C.S.U. admission requirements are 26% points behind the graduation cohort at large. English Language Proficiency Assessment for California (ELPAC) Summative results show that less than half (45.6%) of our English Learners are making a year or more growth in acquiring English language skills. The District recognizes the need to take steps to better address the needs of our English Learners.

Student educational partners have expressed several ideas around the theme of post-secondary preparation: An emphasis on roles or path for high school and beyond, possibly creating cohort groups that stay with same advisory teacher all four years to feel connected to help for students to establish a path for after high school and great bond to teacher and students in class. In that vein, another suggestion was for teachers to be "assigned" so they can get to know the students well and can write letters of recommendation for college applications. Some students felt that all students should be able to be A-G compliant and then decide if they want to go to college, etc. They asked that college field trips continue, as they are important and have really helped in showing the path to college is available. Finally, regarding post-secondary preparation, another suggestions was to provide more AP prep test books, an SAT prep course, and increased counseling services. Students also mentioned the addition of an ASL course because they have read there is a shortage of experts to sign for meetings and events.

The District recognizes that the early Assessment Program (EAP), requirements for entry into UC/CSU (A-G), completion of a Career/Technical Education pathway (CTE), passing Advanced Placement exams (AP), College and Career readiness (CCI), and Graduation Rates were all inter-related and were all measures of skills and knowledge that pointed toward preparation for post-secondary success. As noted above, our Low-Income students and English Learners are lagging behind their peers in several of those indicators, and teachers' anecdotal information is that Foster Youth are lagging, as well. In order to ensure that those student groups are poised for that success, the District looked at successful programs throughout California and determined that a multi-faceted approach that recognized the interrelatedness of the skills and knowledge and addressed those as part of a plan for success, and that recognized that preparation for college and career readiness begins before high school, would be effective with our students.

The actions, or aspect(s) of the actions, based on these considerations:

Goal 3, Action 1 -- The District will provide:

- Increased access to counseling services to support monitoring the progress and advising Low-Income students, English Learners, and Foster Youth toward successful graduation, enrollment in AP classes, and completion of A-G and/or pathway requirements.
- Increased academic guidance and academic opportunities to participate in a broad course of study in preparation for post-secondary eligibility to better meet the needs of Low Income Students, English Learners, and Foster Youth.
- Monitoring of Low Income Students, English Learners, Foster Youth progress in meeting post-secondary eligibility, utilizing various data systems to review graduation requirements, A-G and CTE completion, and enrolled in courses necessary to apply to four-year universities, prepare for enrollment in a community college, and/or prepared to successfully enter the military or workforce after graduation.
- Provide American Sign Language (ASL) as a CTE class to increase the employability of our Low-Income students post graduation. ASL was recognized by Low-Income students at CHS as a possible pathway to good-paying jobs after graduation, as they believe that there is a shortage of expert "signers", and the suggestion was made to the school principal. Students also pointed out that it could serve as another language to increase the offerings for world Languages.
- College and career field trips for Low Income Students, English Learners, and Foster Youth in grades 7th-12th, where they can see what a four-year college campus looks like, and talk to college educators and students from similar circumstances who will encourage them to attend. Also visit at least one CTE program at a community college so they can learn about a greater variety of post-secondary career paths than it is possible to provide at a small high school like Caruthers High. Additionally, they will talk to college educators and students from similar circumstances who will encourage them to attend.
- FASFA and Dream Act workshops for Low Income Students, English Learners, and Foster Youth.
- College prep workshops for Low Income Students, English Learners, and Foster Youth. The Education Commission of the States (E.C.S.) found that "students and parents are misinformed about what it takes to prepare for college. Fewer than 12 percent of high-schoolers even know what courses they should take…students whose parents did not go to college are at a particular disadvantage." These workshops will support their understanding of what is possible for students to continue their education after high school.
- Recruiting Low-Income students, English Learners, Foster Youth for AP classes
- PSAT fees for Low-Income students, English Learners, Foster Youth so their financial circumstances do not prevent them form taking the exam that may be necessary for some scholarships and admission to some universities.
- A CTE/ROP Coordinator to support Low Income Students, English Learners, and Foster Youth in completing pathways
- A High School Migrant Counselor who assists parents with EL and Low-Income Migrant program activities, recruit for migrant conferences and events. Most of our parents of migrant students are not English speakers and did not graduate from college. As noted above, they and their children may be at a disadvantage when it comes to understanding what is necessary to prepare for college. The Migrant Counselor will support those families to help their children in preparing for post-secondary success.
- Low Income Students, English Learners, and Foster Youth Parents' conferences regarding: student academic progress, post-secondary plans, and personal needs

- Develop and implement a plan for student tutors to support Low Income Students, English Learners, and Foster Youth, an initiative requested by and organized by Low-Income students and English Learners who want more focused academic support to prepare for exams and graduate successfully.

How the action is intended to help achieve an expected measurable outcome of the associated goal:

Goal 3, Action 1 -- Edward Locke and Gary Latham (1990) found in their research, goals not only affect behavior as well as job performance, but they also help mobilize energy which leads to a higher effort overall. Higher effort leads to an increase in persistent effort. Locke and Latham's research have shown us that goal setting is indeed very effective. In the 1968 article "Toward a Theory of Task Motivation" Locke showed us that clear goals and appropriate feedback served as a good motivator. (Locke, 1968). Locke's research also revealed that working toward a goal is a major source of motivation, which, in turn, improves performance. Locke reviewed over a decade of research of laboratory and field studies on the effects of goal setting and performance. Locke found that over 90% of the time, goals that were specific and challenging, but not overly challenging, led to higher performance when compared to easy goals or goals that were too generic such as a goal to do your best. Dr. Gary Latham also studied the effects of goal setting in the workplace. Latham's results supported Locke's findings and showed there is indeed a link that is inseparable between goal setting and workplace performance. Locke and Latham published work together in 1990 with their work "A Theory of Goal Setting & Task Performance" stressing the importance of setting goals that were both specific and difficult. Locke and Latham also stated that there are five goal-setting principles that can help improve chances of success:

Clarity

Challenge

Commitment

Feedback

Task Complexity

This action is based upon the principles outlined in Locke and Latham's research, that by helping Low-Income students, English Learners, and Foster Youth to set clear, challenging goals, monitoring those goals and providing actionable feedback, and supporting every students commitment to his or her goal, will result in increased student outcomes in all of the metrics associated with this goal, with those students decreasing inequalities in performance results.

The intent of providing these increased supports, staffing, and opportunities for Low-Income students, English Learners, and Foster Youth high school students is to better prepare them for post-secondary success. Specifically, additional/increased access to information, experiences, activities, and the targeted support from well-informed adults at school are designed to address the root cause of low participation in activities that promote post-secondary preparedness so that students better understand how to position themselves for success after K-12 and successfully engage in a variety of post-secondary opportunities.

We were successful in providing increased access to counseling services at the high school. The increased academic guidance and academic opportunities to participate in a broad course of study in preparation for postsecondary eligibility to better meet the needs of low

income and EL pupils combined with monitoring of students' progress in meeting post-secondary eligibility was successful as the student groups large enough to report data showed double digit increases in the percentages that graduated with a confirmed plans of enrollment in college, university, vocational program, or military. FASFA and Dream Act workshops were held, as were college prep workshops for Low-Income students, English Learners, and Foster Youth. Recruiting Low-Income students, English Learners, Foster Youth, and homeless students for AP classes took place. The District paid the PSAT fees for Low-Income students, English Learners, and Foster Youth who took the exam. The success of the CTE/ROP Coordinator to support students in completing pathways is reflected in completion rates overall and for student groups almost doubling, or more, from baseline rates. Parent conferences for Low-Income students, English Learners, Foster Youth regarding student academic progress, post-secondary plans, and personal needs were also successful, again as shown in the percentages of students graduating with post-secondary plans.

We expect to see increases in all of the metrics associated with this goal.

Most of these actions and services are being performed on a schoolwide or districtwide basis in order to increase the positive impacts of these actions and services for our Low-Income students, English Learners, and Foster Youth. This means of delivering services and use of resources is believed to be the best way of engaging those students in ways that avoid tracking or forced segregation into a "class structure." C. T. Vang found in a 2005 study, that the effects of tracking are particularly negative for poor, minority, and limited English proficient students. By providing most services districtwide, we will be able to decrease inequalities in performance results and serve the students who generated the supplemental and concentration funds while continuing to build a positive and inclusive district culture. The exceptions is Action 1.9, which is specifically for English Learners.

The District's support for Low-Income students, English Learners, and Foster Youth will not be limited to LCFF-funded actions. Funded by Expanded Learning Opportunity Grant funds this year, the District will also provide a summer extended learning program for learning recovery, acceleration, enrichment, English language development, credit recovery, and original credit classes for grades K-12. Across grades K–12, increased learning time programs had a small but statistically significant positive effect on students' academic motivation (defined as school attendance, homework completion, teachers' assessments of students' work effort in class, and students' self-reports of their motivation to learn), compared with similar students who did not participate in the programs." [Kidron and Lindsay, 2014], The expenditures for these actions will not be considered "contributing" to the District meeting its mandatory percentage of increased/improved services, but these supports are directed towards addressing the needs of our high-risk populations who have been disproportionately adversely affected – academically, emotionally, and physically -- by the pandemic.

A description of how services for foster youth, English learners, and low-income students are being increased or improved by the percentage required.

The Caruthers Unified School District provides a basic instructional program designed to provide learning opportunities for all students. However, the District's budget of $17,393,363 in LCFF base funding constrains the services the District is able to provide. After examining the needs of our Low-Income students, English Learners, and Foster Youth, the District uses LCFF funds of $6,788,660, and other resources to provide the additional actions and services as described above. For example, in order to increase graduation rates, and improve academic outcomes for our high-needs students, the District has used S/C funds to hire properly credentialed teachers for the purpose of reducing class sizes as needed for grades 4-12. In turn, graduation rates have increased.

Most increased/improved services are Districtwide initiatives aimed at increasing success for all students by using strategies principally directed to improve the educational outcomes of Low-Income students, English Learners, and Foster Youth. The exception is Action 1.9, which is specifically for English Learners. These actions and services would not be provided or increased and/or improved to the degree to which they are available to our high-needs students without the availability of the S/C funds.

While all students may receive some of the services, the actions/services described in this section are principally directed at increasing or improving services and outcomes for Low-Income students, English Learners, and Foster Youth. We believe no action provides a disproportionate increase or improvement in services for the 11% of students not included in the those student groups.

The percentage of all increased/improved services for high-needs students of 40.13% exceeds the 39.71% noted at the top of this section.

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

Action 2.3: Since the start of the pandemic, our Low Income, Foster Youth, and English Learner students, who have experienced disproportionate learning losses in math and ELA, have also experienced higher chronic absenteeism rates than the Overall student population. Based on these identified needs, and suggestions from our educational partners to expand social-emotional supports, the District will use its 15% Concentration Grant Add-on to continue an additional Mental Health Clinician, four Mental Health Interns, and an additional full-time LVN to support students physical and social-emotional health.

Action 3.1: The EAP data indicate that the effects of the pandemic disproportionately affected Low-Income students in math and that significant inequalities between that student group and our overall student performance in math may have been exacerbated by the impacts of school closures and distance learning. English Learners continue to lag significantly behind their graduating peers in the Dashboard College and Career indicator readiness measures. Both Low-income students and English Learners are achieving lower levels of A-G completion and graduation rates than the high school graduating cohort as a whole. To address these issues, the District will use its 15% Concentration Grant Add-on to continue a Director of College and Career Readiness to provide direct services to students, and a Careers in Education instructor to guide students in that pathway.

Staff-to-student ratios by type of school and concentration of unduplicated students	Schools with a student concentration of 55 percent or less	Schools with a student concentration of greater than 55 percent
Staff-to-student ratio of classified staff providing direct services to students	0	n/a
Staff-to-student ratio of certificated staff providing direct services to students	0	n/a

2023-24 Total Expenditures Table

Totals	LCFF Funds	Other State Funds	Local Funds	Federal Funds	Total Funds	Total Personnel	Total Non-personnel
Totals	$21,597,322.00	$5,841,521.00	$2,173,184.00	$3,010,304.00	$32,622,331.00	$21,113,049.00	$11,509,282.00

Goal	Action #	Action Title	Student Group(s)	LCFF Funds	Other State Funds	Local Funds	Federal Funds	Total Funds

Instructions

Plan Summary

Engaging Educational Partners

Goals and Actions

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students

For additional questions or technical assistance related to the completion of the Local Control and Accountability Plan (LCAP) template, please contact the local county office of education (COE), or the California Department of Education's (CDE's) Local Agency Systems Support Office, by phone at 916-319-0809 or by email at lcff@cde.ca.gov.

Introduction and Instructions

The Local Control Funding Formula (LCFF) requires local educational agencies (LEAs) to engage their local educational partners in an annual planning process to evaluate their progress within eight state priority areas encompassing all statutory metrics (COEs have 10 state priorities). LEAs document the results of this planning process in the LCAP using the template adopted by the State Board of Education.

The LCAP development process serves three distinct, but related functions:

- **Comprehensive Strategic Planning:** The process of developing and annually updating the LCAP supports comprehensive strategic planning (California *Education Code* [*EC*] Section 52064[e][1]). Strategic planning that is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students.

- **Meaningful Engagement of Educational Partners:** The LCAP development process should result in an LCAP that reflects decisions made through meaningful engagement (*EC* Section 52064[e][1]). Local educational partners possess valuable perspectives and insights about an LEA's programs and services. Effective strategic planning will incorporate these perspectives and insights in order to identify potential goals and actions to be included in the LCAP.

- **Accountability and Compliance:** The LCAP serves an important accountability function because aspects of the LCAP template require LEAs to show that they have complied with various requirements specified in the LCFF statutes and regulations, most notably:

  - Demonstrating that LEAs are increasing or improving services for foster youth, English learners, and low-income students in proportion to the amount of additional funding those students generate under LCFF (*EC* Section 52064[b][4-6]).

  - Establishing goals, supported by actions and related expenditures, that address the statutory priority areas and statutory metrics (*EC* sections 52064[b][1] and [2]).

  - Annually reviewing and updating the LCAP to reflect progress toward the goals (*EC* Section 52064[b][7]).

The LCAP template, like each LEA's final adopted LCAP, is a document, not a process. LEAs must use the template to memorialize the outcome of their LCAP development process, which should: (a) reflect comprehensive strategic planning (b) through meaningful engagement with educational partners that (c) meets legal requirements, as reflected in the final adopted LCAP. The sections included within the LCAP template do not and cannot reflect the full development process, just as the LCAP template itself is not intended as a tool for engaging educational partners.

If a county superintendent of schools has jurisdiction over a single school district, the county board of education and the governing board of the school district may adopt and file for review and approval a single LCAP consistent with the requirements in *EC* sections 52060, 52062, 52066, 52068, and 52070. The LCAP must clearly articulate to which entity's budget (school district or county superintendent of schools) all budgeted and actual expenditures are aligned.

The revised LCAP template for the 2021–22, 2022–23, and 2023–24 school years reflects statutory changes made through Assembly Bill 1840 (Committee on Budget), Chapter 243, Statutes of 2018. These statutory changes enhance transparency regarding expenditures on actions included in the LCAP, including actions that contribute to meeting the requirement to increase or improve services for foster youth, English learners, and low-income students, and to streamline the information presented within the LCAP to make adopted LCAPs more accessible for educational partners and the public.

At its most basic, the adopted LCAP should attempt to distill not just what the LEA is doing for students in transitional kindergarten through grade twelve (TK–12), but also allow educational partners to understand why, and whether those strategies are leading to improved opportunities and outcomes for students. LEAs are strongly encouraged to use language and a level of detail in their adopted LCAPs intended to be meaningful and accessible for the LEA's diverse educational partners and the broader public.

In developing and finalizing the LCAP for adoption, LEAs are encouraged to keep the following overarching frame at the forefront of the strategic planning and educational partner engagement functions:

> Given present performance across the state priorities and on indicators in the California School Dashboard (Dashboard), how is the LEA using its budgetary resources to respond to TK–12 student and community needs, and address any performance gaps, including by meeting its obligation to increase or improve services for foster youth, English learners, and low-income students?

LEAs are encouraged to focus on a set of metrics and actions that the LEA believes, based on input gathered from educational partners, research, and experience, will have the biggest impact on behalf of its TK–12 students.

These instructions address the requirements for each section of the LCAP, but may include information about effective practices when developing the LCAP and completing the LCAP itself. Additionally, information is included at the beginning of each section emphasizing the purpose that each section serves.

Plan Summary
Purpose

A well-developed Plan Summary section provides a meaningful context for the LCAP. This section provides information about an LEA's community as well as relevant information about student needs and performance. In order to provide a meaningful context for the rest of the LCAP, the content of this section should be clearly and meaningfully related to the content included in the subsequent sections of the LCAP.

Requirements and Instructions

General Information – Briefly describe the LEA, its schools, and its students in grades TK–12, as applicable to the LEA. For example, information about an LEA in terms of geography, enrollment, or employment, the number and size of specific schools, recent community challenges, and other such information as an LEA wishes to include can enable a reader to more fully understand an LEA's LCAP.

Reflections: Successes – Based on a review of performance on the state indicators and local performance indicators included in the Dashboard, progress toward LCAP goals, local self-assessment tools, input from educational partners, and any other information, what progress is the LEA most proud of and how does the LEA plan to maintain or build upon that success? This may include identifying specific examples of how past increases or improvements in services for foster youth, English learners, and low-income students have led to improved performance for these students.

Reflections: Identified Need – Referring to the Dashboard, identify: (a) any state indicator for which overall performance was in the "Red" or "Orange" performance category or any local indicator where the LEA received a "Not Met" or "Not Met for Two or More Years" rating AND (b) any state indicator for which performance for any student group was two or more performance levels below the "all student" performance. What steps is the LEA planning to take to address these areas of low performance and performance gaps? An LEA that is required to include a goal to address one or more consistently low-performing student groups or low-performing schools must identify that it is required to include this goal and must also identify the applicable student group(s) and/or school(s). Other needs may be identified using locally collected data including data collected to inform the self-reflection tools and reporting local indicators on the Dashboard.

LCAP Highlights – Identify and briefly summarize the key features of this year's LCAP.

Comprehensive Support and Improvement – An LEA with a school or schools identified for comprehensive support and improvement (CSI) under the Every Student Succeeds Act must respond to the following prompts:

- **Schools Identified**: Identify the schools within the LEA that have been identified for CSI.

- **Support for Identified Schools**: Describe how the LEA has or will support the identified schools in developing CSI plans that included a school-level needs assessment, evidence-based interventions, and the identification of any resource inequities to be addressed through the implementation of the CSI plan.

- **Monitoring and Evaluating Effectiveness**: Describe how the LEA will monitor and evaluate the implementation and effectiveness of the CSI plan to support student and school improvement.

Engaging Educational Partners

Purpose

Significant and purposeful engagement of parents, students, educators, and other educational partners, including those representing the student groups identified by LCFF, is critical to the development of the LCAP and the budget process. Consistent with statute, such engagement should support comprehensive strategic planning, accountability, and improvement across the state priorities and locally identified priorities (*EC* Section 52064[e][1]). Engagement of educational partners is an ongoing, annual process.

This section is designed to reflect how the engagement of educational partners influenced the decisions reflected in the adopted LCAP. The goal is to allow educational partners that participated in the LCAP development process and the broader public understand how the LEA engaged educational partners and the impact of that engagement. LEAs are encouraged to keep this goal in the forefront when completing this section.

Statute and regulations specify the educational partners that school districts and COEs must consult when developing the LCAP: teachers, principals, administrators, other school personnel, local bargaining units of the LEA, parents, and students. Before adopting the LCAP, school districts and COEs must share it with the Parent Advisory Committee and, if applicable, to its English Learner Parent Advisory Committee. The superintendent is required by statute to respond in writing to the comments received from these committees. School districts and COEs must also consult with the special education local plan area administrator(s) when developing the LCAP.

Statute requires charter schools to consult with teachers, principals, administrators, other school personnel, parents, and students in developing the LCAP. The LCAP should also be shared with, and LEAs should request input from, schoolsite-level advisory groups, as applicable (e.g., schoolsite councils, English Learner Advisory Councils, student advisory groups, etc.), to facilitate alignment between schoolsite and district-level goals and actions.

Information and resources that support effective engagement, define student consultation, and provide the requirements for advisory group composition, can be found under Resources on the following web page of the CDE's website: https://www.cde.ca.gov/re/lc/.

Requirements and Instructions

Below is an excerpt from the 2018–19 *Guide for Annual Audits of K–12 Local Education Agencies and State Compliance Reporting*, which is provided to highlight the legal requirements for engagement of educational partners in the LCAP development process:

Local Control and Accountability Plan:
For county offices of education and school districts only, verify the LEA:

a) Presented the local control and accountability plan to the parent advisory committee in accordance with Education Code section 52062(a)(1) or 52068(a)(1), as appropriate.

b) If applicable, presented the local control and accountability plan to the English learner parent advisory committee, in accordance with Education Code section 52062(a)(2) or 52068(a)(2), as appropriate.

c) Notified members of the public of the opportunity to submit comments regarding specific actions and expenditures proposed to be included in the local control and accountability plan in accordance with Education Code section 52062(a)(3) or 52068(a)(3), as appropriate.

d) Held at least one public hearing in accordance with Education Code section 52062(b)(1) or 52068(b)(1), as appropriate.

e) Adopted the local control and accountability plan in a public meeting in accordance with Education Code section 52062(b)(2) or 52068(b)(2), as appropriate.

Prompt 1: "A summary of the process used to engage educational partners and how this engagement was considered before finalizing the LCAP."

Describe the engagement process used by the LEA to involve educational partners in the development of the LCAP, including, at a minimum, describing how the LEA met its obligation to consult with all statutorily required educational partners as applicable to the type of LEA. A sufficient response to this prompt must include general information about the timeline of the process and meetings or other engagement strategies with educational partners. A response may also include information about an LEA's philosophical approach to engaging its educational partners.

Prompt 2: "A summary of the feedback provided by specific educational partners."

Describe and summarize the feedback provided by specific educational partners. A sufficient response to this prompt will indicate ideas, trends, or inputs that emerged from an analysis of the feedback received from educational partners.

Prompt 3: "A description of the aspects of the LCAP that were influenced by specific input from educational partners."

A sufficient response to this prompt will provide educational partners and the public with clear, specific information about how the engagement process influenced the development of the LCAP. The response must describe aspects of the LCAP that were influenced by or developed in response to the educational partner feedback described in response to Prompt 2. This may include a description of how the LEA prioritized requests of educational partners within the context of the budgetary resources available or otherwise prioritized areas of focus within the LCAP. For the purposes of this prompt, "aspects" of an LCAP that may have been influenced by educational partner input can include, but are not necessarily limited to:

- Inclusion of a goal or decision to pursue a Focus Goal (as described below)
- Inclusion of metrics other than the statutorily required metrics
- Determination of the desired outcome on one or more metrics
- Inclusion of performance by one or more student groups in the Measuring and Reporting Results subsection
- Inclusion of action(s) or a group of actions
- Elimination of action(s) or group of actions
- Changes to the level of proposed expenditures for one or more actions

- Inclusion of action(s) as contributing to increased or improved services for unduplicated services
- Determination of effectiveness of the specific actions to achieve the goal
- Determination of material differences in expenditures
- Determination of changes made to a goal for the ensuing LCAP year based on the annual update process
- Determination of challenges or successes in the implementation of actions

Goals and Actions

Purpose

Well-developed goals will clearly communicate to educational partners what the LEA plans to accomplish, what the LEA plans to do in order to accomplish the goal, and how the LEA will know when it has accomplished the goal. A goal statement, associated metrics and expected outcomes, and the actions included in the goal should be in alignment. The explanation for why the LEA included a goal is an opportunity for LEAs to clearly communicate to educational partners and the public why, among the various strengths and areas for improvement highlighted by performance data and strategies and actions that could be pursued, the LEA decided to pursue this goal, and the related metrics, expected outcomes, actions, and expenditures.

A well-developed goal can be focused on the performance relative to a metric or metrics for all students, a specific student group(s), narrowing performance gaps, or implementing programs or strategies expected to impact outcomes. LEAs should assess the performance of their student groups when developing goals and the related actions to achieve such goals.

Requirements and Instructions

LEAs should prioritize the goals, specific actions, and related expenditures included within the LCAP within one or more state priorities. LEAs should consider performance on the state and local indicators, including their locally collected and reported data for the local indicators that are included in the Dashboard in determining whether and how to prioritize its goals within the LCAP.

In order to support prioritization of goals, the LCAP template provides LEAs with the option of developing three different kinds of goals:

- Focus Goal: A Focus Goal is relatively more concentrated in scope and may focus on a fewer number of metrics to measure improvement. A Focus Goal statement will be time bound and make clear how the goal is to be measured.

- Broad Goal: A Broad Goal is relatively less concentrated in its scope and may focus on improving performance across a wide range of metrics.

- Maintenance of Progress Goal: A Maintenance of Progress Goal includes actions that may be ongoing without significant changes and allows an LEA to track performance on any metrics not addressed in the other goals of the LCAP.

At a minimum, the LCAP must address all LCFF priorities and associated metrics.

Focus Goal(s)
Goal Description: The description provided for a Focus Goal must be specific, measurable, and time bound. An LEA develops a Focus Goal to address areas of need that may require or benefit from a more specific and data intensive approach. The Focus Goal can explicitly reference the metric(s) by which achievement of the goal will be measured and the time frame according to which the LEA expects to achieve the goal.

Explanation of why the LEA has developed this goal: Explain why the LEA has chosen to prioritize this goal. An explanation must be based on Dashboard data or other locally collected data. LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners. LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.

Broad Goal
Goal Description: Describe what the LEA plans to achieve through the actions included in the goal. The description of a broad goal will be clearly aligned with the expected measurable outcomes included for the goal. The goal description organizes the actions and expected outcomes in a cohesive and consistent manner. A goal description is specific enough to be measurable in either quantitative or qualitative terms. A broad goal is not as specific as a focus goal. While it is specific enough to be measurable, there are many different metrics for measuring progress toward the goal.

Explanation of why the LEA has developed this goal: Explain why the LEA developed this goal and how the actions and metrics grouped together will help achieve the goal.

Maintenance of Progress Goal
Goal Description: Describe how the LEA intends to maintain the progress made in the LCFF State Priorities not addressed by the other goals in the LCAP. Use this type of goal to address the state priorities and applicable metrics not addressed within the other goals in the LCAP. The state priorities and metrics to be addressed in this section are those for which the LEA, in consultation with educational partners, has determined to maintain actions and monitor progress while focusing implementation efforts on the actions covered by other goals in the LCAP.

Explanation of why the LEA has developed this goal: Explain how the actions will sustain the progress exemplified by the related metrics.

Required Goals
In general, LEAs have flexibility in determining what goals to include in the LCAP and what those goals will address; however, beginning with the development of the 2022–23 LCAP, LEAs that meet certain criteria are required to include a specific goal in their LCAP.

Consistently low-performing student group(s) criteria: An LEA is eligible for Differentiated Assistance for three or more consecutive years based on the performance of the same student group or groups in the Dashboard. A list of the LEAs required to include a goal in the LCAP based on student group performance, and the student group(s) that lead to identification, may be found on the CDE's Local Control Funding Formula web page at https://www.cde.ca.gov/fg/aa/lc/.

- **Consistently low-performing student group(s) goal requirement:** An LEA meeting the consistently low-performing student group(s) criteria must include a goal in its LCAP focused on improving the performance of the student group or groups that led to the LEA's eligibility for Differentiated

Assistance. This goal must include metrics, outcomes, actions, and expenditures specific to addressing the needs of, and improving outcomes for, this student group or groups. An LEA required to address multiple student groups is not required to have a goal to address each student group; however, each student group must be specifically addressed in the goal. This requirement may not be met by combining this required goal with another goal.

- **Goal Description:** Describe the outcomes the LEA plans to achieve to address the needs of, and improve outcomes for, the student group or groups that led to the LEA's eligibility for Differentiated Assistance.

- **Explanation of why the LEA has developed this goal**: Explain why the LEA is required to develop this goal, including identifying the student group(s) that lead to the LEA being required to develop this goal, how the actions and associated metrics included in this goal differ from previous efforts to improve outcomes for the student group(s), and why the LEA believes the actions, metrics, and expenditures included in this goal will help achieve the outcomes identified in the goal description.

Low-performing school(s) criteria: The following criteria only applies to a school district or COE with two or more schools; it does not apply to a single-school district. A school district or COE has one or more schools that, for two consecutive years, received the two lowest performance levels on all but one of the state indicators for which the school(s) receive performance levels in the Dashboard and the performance of the "All Students" student group for the LEA is at least one performance level higher in all of those indicators. A list of the LEAs required to include a goal in the LCAP based on school performance, and the school(s) that lead to identification, may be found on the CDE's Local Control Funding Formula web page at https://www.cde.ca.gov/fg/aa/lc/.

- **Low-performing school(s) goal requirement:** A school district or COE meeting the low-performing school(s) criteria must include a goal in its LCAP focusing on addressing the disparities in performance between the school(s) and the LEA as a whole. This goal must include metrics, outcomes, actions, and expenditures specific to addressing the needs of, and improving outcomes for, the students enrolled at the low-performing school or schools. An LEA required to address multiple schools is not required to have a goal to address each school; however, each school must be specifically addressed in the goal. This requirement may not be met by combining this goal with another goal.

- **Goal Description:** Describe what outcomes the LEA plans to achieve to address the disparities in performance between the students enrolled at the low-performing school(s) and the students enrolled at the LEA as a whole.

- **Explanation of why the LEA has developed this goal**: Explain why the LEA is required to develop this goal, including identifying the schools(s) that lead to the LEA being required to develop this goal; how the actions and associated metrics included in this goal differ from previous efforts to improve outcomes for the school(s); and why the LEA believes the actions, metrics, and expenditures included in this goal will help achieve the outcomes for students enrolled at the low-performing school or schools identified in the goal description.

Measuring and Reporting Results:
For each LCAP year, identify the metric(s) that the LEA will use to track progress toward the expected outcomes. LEAs are encouraged to identify metrics for specific student groups, as appropriate, including expected outcomes that would reflect narrowing of any existing performance gaps.

Include in the baseline column the most recent data associated with this metric available at the time of adoption of the LCAP for the first year of the three-year plan. LEAs may use data as reported on the 2019 Dashboard for the baseline of a metric only if that data represents the most recent available (e.g., high school graduation rate).

Using the most recent data available may involve reviewing data the LEA is preparing for submission to the California Longitudinal Pupil Achievement Data System (CALPADS) or data that the LEA has recently submitted to CALPADS. Because final 2020–21 outcomes on some metrics may not be computable at the time the 2021–24 LCAP is adopted (e.g., graduation rate, suspension rate), the most recent data available may include a point in time calculation taken each year on the same date for comparability purposes.

The baseline data shall remain unchanged throughout the three-year LCAP.

Complete the table as follows:

- **Metric**: Indicate how progress is being measured using a metric.

- **Baseline**: Enter the baseline when completing the LCAP for 2021–22. As described above, the baseline is the most recent data associated with a metric. Indicate the school year to which the data applies, consistent with the instructions above.

- **Year 1 Outcome**: When completing the LCAP for 2022–23, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above.

- **Year 2 Outcome**: When completing the LCAP for 2023–24, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above.

- **Year 3 Outcome**: When completing the LCAP for 2024–25, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above. The 2024–25 LCAP will be the first year in the next three-year cycle. Completing this column will be part of the Annual Update for that year.

- **Desired Outcome for 2023–24**: When completing the first year of the LCAP, enter the desired outcome for the relevant metric the LEA expects to achieve by the end of the 2023–24 LCAP year.

Timeline for completing the "**Measuring and Reporting Results**" part of the Goal.

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for Year 3 (2023–24)
Enter information in this box when completing the LCAP for **2021–22**.	Enter information in this box when completing the LCAP for **2021–22**.	Enter information in this box when completing the LCAP for **2022–23**. Leave blank until then.	Enter information in this box when completing the LCAP for **2023–24**. Leave blank until then.	Enter information in this box when completing the LCAP for **2024–25**. Leave blank until then.	Enter information in this box when completing the LCAP for **2021–22** or when adding a new metric.

The metrics may be quantitative or qualitative; but at minimum, an LEA's LCAP must include goals that are measured using all of the applicable metrics for the related state priorities, in each LCAP year as applicable to the type of LEA. To the extent a state priority does not specify one or more metrics (e.g., implementation of state academic content and performance standards), the LEA must identify a metric to use within the LCAP. For these state priorities, LEAs are encouraged to use metrics based on or reported through the relevant self-reflection tool for local indicators within the Dashboard.

Actions: Enter the action number. Provide a short title for the action. This title will also appear in the action tables. Provide a description of the action. Enter the total amount of expenditures associated with this action. Budgeted expenditures from specific fund sources will be provided in the summary tables. Indicate whether the action contributes to meeting the increase or improved services requirement as described in the Increased or Improved Services section using a "Y" for Yes or an "N" for No. (**Note:** for each such action offered on an LEA-wide or schoolwide basis, the LEA will need to provide additional information in the Increased or Improved Summary Section to address the requirements in *California Code of Regulations*, Title 5 [5 *CCR*] Section 15496(b) in the Increased or Improved Services Section of the LCAP).

Actions for English Learners: School districts, COEs, and charter schools that have a numerically significant English learner student subgroup must include specific actions in the LCAP related to, at a minimum, the language acquisition programs, as defined in *EC* Section 306, provided to students and professional development activities specific to English learners.

Actions for Foster Youth: School districts, COEs, and charter schools that have a numerically significant Foster Youth student subgroup are encouraged to include specific actions in the LCAP designed to meet needs specific to Foster Youth students.

Goal Analysis:

Enter the LCAP Year.

Using actual annual measurable outcome data, including data from the Dashboard, analyze whether the planned actions were effective in achieving the goal. Respond to the prompts as instructed.

- Describe the overall implementation of the actions to achieve the articulated goal. Include a discussion of relevant challenges and successes experienced with the implementation process. This must include any instance where the LEA did not implement a planned action or implemented a planned action in a manner that differs substantively from how it was described in the adopted LCAP.

- Explain material differences between Budgeted Expenditures and Estimated Actual Expenditures and between the Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services, as applicable. Minor variances in expenditures or percentages do not need to be addressed, and a dollar-for-dollar accounting is not required.

- Describe the effectiveness of the specific actions to achieve the articulated goal as measured by the LEA. In some cases, not all actions in a goal will be intended to improve performance on all of the metrics associated with the goal. When responding to this prompt, LEAs may assess the effectiveness of a single action or group of actions within the goal in the context of performance on a single metric or group of specific metrics within the goal that are applicable to the action(s). Grouping actions with metrics will allow for more robust analysis of whether the strategy the LEA is using to impact a specified set of metrics is working and increase transparency for educational partners. LEAs are encouraged to use such an approach when goals include multiple actions and metrics that are not closely associated.

- Describe any changes made to this goal, expected outcomes, metrics, or actions to achieve this goal as a result of this analysis and analysis of the data provided in the Dashboard or other local data, as applicable.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students

Purpose

A well-written Increased or Improved Services section provides educational partners with a comprehensive description, within a single dedicated section, of how an LEA plans to increase or improve services for its unduplicated students in grades TK–12 as compared to all students in grades TK–12, as applicable, and how LEA-wide or schoolwide actions identified for this purpose meet regulatory requirements. Descriptions provided should include sufficient detail yet be sufficiently succinct to promote a broader understanding of educational partners to facilitate their ability to provide input. An LEA's description in this section must align with the actions included in the Goals and Actions section as contributing.

Requirements and Instructions

Projected LCFF Supplemental and/or Concentration Grants: Specify the amount of LCFF supplemental and concentration grant funds the LEA estimates it will receive in the coming year based on the number and concentration of low income, foster youth, and English learner students.

Projected Additional LCFF Concentration Grant (15 percent): Specify the amount of additional LCFF concentration grant add-on funding, as described in *EC* Section 42238.02, that the LEA estimates it will receive in the coming year.

Projected Percentage to Increase or Improve Services for the Coming School Year: Specify the estimated percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year as calculated pursuant to 5 *CCR* Section 15496(a)(7).

LCFF Carryover — Percentage: Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).

LCFF Carryover — Dollar: Specify the LCFF Carryover — Dollar amount identified in the LCFF Carryover Table. If a carryover amount is not identified in the LCFF Carryover Table, specify an amount of zero ($0).

Total Percentage to Increase or Improve Services for the Coming School Year: Add the Projected Percentage to Increase or Improve Services for the Coming School Year and the Proportional LCFF Required Carryover Percentage and specify the percentage. This is the LEAs percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year, as calculated pursuant to 5 *CCR* Section 15496(a)(7).

Required Descriptions:

For each action being provided to an entire school, or across the entire school district or COE, an explanation of (1) how the needs of foster youth, English learners, and low-income students were considered first, and (2) how these actions are effective in meeting the goals for these students.

For each action included in the Goals and Actions section as contributing to the increased or improved services requirement for unduplicated pupils and provided on an LEA-wide or schoolwide basis, the LEA must include an explanation consistent with 5 *CCR* Section 15496(b). For any such actions continued into the 2021–24 LCAP from the 2017–2020 LCAP, the LEA must determine whether or not the action was effective as expected, and this determination must reflect evidence of outcome data or actual implementation to date.

Principally Directed and Effective: An LEA demonstrates how an action is principally directed towards and effective in meeting the LEA's goals for unduplicated students when the LEA explains how:

- It considers the needs, conditions, or circumstances of its unduplicated pupils;

- The action, or aspect(s) of the action (including, for example, its design, content, methods, or location), is based on these considerations; and

- The action is intended to help achieve an expected measurable outcome of the associated goal.

As such, the response provided in this section may rely on a needs assessment of unduplicated students.

Conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient. Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increase or improve services standard because enrolling students is not the same as serving students.

For example, if an LEA determines that low-income students have a significantly lower attendance rate than the attendance rate for all students, it might justify LEA-wide or schoolwide actions to address this area of need in the following way:

> After assessing the needs, conditions, and circumstances of our low-income students, we learned that the attendance rate of our low-income students is 7 percent lower than the attendance rate for all students. (Needs, Conditions, Circumstances [Principally Directed])
>
> In order to address this condition of our low-income students, we will develop and implement a new attendance program that is designed to address some of the major causes of absenteeism, including lack of reliable transportation and food, as well as a school climate that does not emphasize the importance of attendance. Goal N, Actions X, Y, and Z provide additional transportation and nutritional resources as well as a districtwide educational campaign on the benefits of high attendance rates. (Contributing Action[s])
>
> These actions are being provided on an LEA-wide basis and we expect/hope that all students with less than a 100 percent attendance rate will benefit. However, because of the significantly lower attendance rate of low-income students, and because the actions meet needs most associated with the chronic stresses and experiences of a socio-economically disadvantaged status, we expect that the attendance rate for our low-income students will increase significantly more than the average attendance rate of all other students. (Measurable Outcomes [Effective In])

COEs and Charter Schools: Describe how actions included as contributing to meeting the increased or improved services requirement on an LEA-wide basis are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities as described above. In the case of COEs and charter schools, schoolwide and LEA-wide are considered to be synonymous.

For School Districts Only:

Actions Provided on an LEA-Wide Basis:

Unduplicated Percentage > 55 percent: For school districts with an unduplicated pupil percentage of 55 percent or more, describe how these actions are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities as described above.

Unduplicated Percentage < 55 percent: For school districts with an unduplicated pupil percentage of less than 55 percent, describe how these actions are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities. Also describe how the actions **are the most effective use of the funds** to meet these goals for its unduplicated pupils. Provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Actions Provided on a Schoolwide Basis:

School Districts must identify in the description those actions being funded and provided on a schoolwide basis, and include the required description supporting the use of the funds on a schoolwide basis.

For schools with 40 percent or more enrollment of unduplicated pupils: Describe how these actions are principally directed to and effective in meeting its goals for its unduplicated pupils in the state and any local priorities.

For school districts expending funds on a schoolwide basis at a school with less than 40 percent enrollment of unduplicated pupils: Describe how these actions are principally directed to and how the actions are the most effective use of the funds to meet its goals for foster youth, English learners, and low-income students in the state and any local priorities.

A description of how services for foster youth, English learners, and low-income students are being increased or improved by the percentage required.

Consistent with the requirements of 5 *CCR* Section 15496, describe how services provided for unduplicated pupils are increased or improved by at least the percentage calculated as compared to the services provided for all students in the LCAP year. To improve services means to grow services in quality and to increase services means to grow services in quantity. Services are increased or improved by those actions in the LCAP that are included in the Goals and Actions section as contributing to the increased or improved services requirement, whether they are provided on an LEA-wide or schoolwide basis or provided on a limited basis to unduplicated students. A limited action is an action that only serves foster youth, English learners, and/or low-income students. This description must address how these action(s) are expected to result in the required proportional increase or improvement in services for unduplicated pupils as compared to the services the LEA provides to all students for the relevant LCAP year.

For any action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage. See the instructions for determining the Planned Percentage of Improved Services for information on calculating the Percentage of Improved Services.

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

An LEA that receives the additional concentration grant add-on described in *EC* Section 42238.02 is required to demonstrate how it is using these funds to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent as compared to the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is equal to or less than 55 percent. The staff who provide direct services to students must be certificated staff and/or classified staff employed by the LEA; classified staff includes custodial staff.

Provide the following descriptions, as applicable to the LEA:

An LEA that does not receive a concentration grant or the concentration grant add-on must indicate that a response to this prompt is not applicable.

Identify the goal and action numbers of the actions in the LCAP that the LEA is implementing to meet the requirement to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent.

An LEA that does not have comparison schools from which to describe how it is using the concentration grant add-on funds, such as an LEA that only has schools with an enrollment of unduplicated students that is greater than 55 percent, must describe how it is using the funds to increase the number of credentialed staff, classified staff, or both, including custodial staff, who provide direct services to students at selected schools and the criteria used to determine which schools require additional staffing support.

In the event that an additional concentration grant add-on is not sufficient to increase staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent, the LEA must describe how it is using the funds to retain staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent.

Complete the table as follows:

- Provide the staff-to-student ratio of classified staff providing direct services to students with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of classified staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA. The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA. The staff-to-student ratio must be based on the number of full time equivalent (FTE) staff and the number of enrolled students as counted on the first Wednesday in October of each year.

- Provide the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA. The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA. The staff-to-student ratio must be based on the number of FTE staff and the number of enrolled students as counted on the first Wednesday in October of each year.

Action Tables

Complete the Data Entry Table for each action in the LCAP. The information entered into this table will automatically populate the other Action Tables. Information is only entered into the Data Entry Table, the Annual Update Table, the Contributing Actions Annual Update Table, and the LCFF Carryover Table. With the exception of the Data Entry Table, the word "input" has been added to column headers to aid in identifying the column(s) where information will be entered. Information is not entered on the remaining Action tables.

The following tables are required to be included as part of the LCAP adopted by the local governing board or governing body:

- Table 1: Total Planned Expenditures Table (for the coming LCAP Year)

- Table 2: Contributing Actions Table (for the coming LCAP Year)

- Table 3: Annual Update Table (for the current LCAP Year)

- Table 4: Contributing Actions Annual Update Table (for the current LCAP Year)

- Table 5: LCFF Carryover Table (for the current LCAP Year)

Note: The coming LCAP Year is the year that is being planned for, while the current LCAP year is the current year of implementation. For example, when developing the 2022–23 LCAP, 2022–23 will be the coming LCAP Year and 2021–22 will be the current LCAP Year.

Data Entry Table

The Data Entry Table may be included in the LCAP as adopted by the local governing board or governing body, but is not required to be included. In the Data Entry Table, input the following information for each action in the LCAP for that applicable LCAP year:

- **LCAP Year**: Identify the applicable LCAP Year.

- **1. Projected LCFF Base Grant**: Provide the total amount of LCFF funding the LEA estimates it will receive for the coming school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Grant Program and the Home to School Transportation Program, pursuant to 5 *CCR* Section 15496(a)(8).

    See *EC* sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF apportionment calculations.

- **2. Projected LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants the LEA estimates it will receive on the basis of the number and concentration of unduplicated students for the coming school year.

- **3. Projected Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected LCFF Base Grant and the Projected LCFF Supplemental and/or Concentration Grants, pursuant to 5 *CCR* Section 15496(a)(8). This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the coming LCAP year.

- **LCFF Carryover — Percentage:** Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table from the prior LCAP year. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).

- **Total Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected Percentage to Increase or Improve Services for the Coming School Year and the LCFF Carryover —

Percentage. This is the percentage by which the LEA must increase or improve services for unduplicated pupils as compared to the services provided to all students in the coming LCAP year.

- **Goal #**: Enter the LCAP Goal number for the action.

- **Action #**: Enter the action's number as indicated in the LCAP Goal.

- **Action Title**: Provide a title of the action.

- **Student Group(s)**: Indicate the student group or groups who will be the primary beneficiary of the action by entering "All," or by entering a specific student group or groups.

- **Contributing to Increased or Improved Services?:** Type "Yes" if the action **is** included as contributing to meeting the increased or improved services; OR, type "No" if the action is **not** included as contributing to meeting the increased or improved services.

- If "Yes" is entered into the Contributing column, then complete the following columns:

  - **Scope**: The scope of an action may be LEA-wide (i.e., districtwide, countywide, or charterwide), schoolwide, or limited. An action that is LEA-wide in scope upgrades the entire educational program of the LEA. An action that is schoolwide in scope upgrades the entire educational program of a single school. An action that is limited in its scope is an action that serves only one or more unduplicated student groups.

  - **Unduplicated Student Group(s)**: Regardless of scope, contributing actions serve one or more unduplicated student groups. Indicate one or more unduplicated student groups for whom services are being increased or improved as compared to what all students receive.

  - **Location**: Identify the location where the action will be provided. If the action is provided to all schools within the LEA, the LEA must indicate "All Schools." If the action is provided to specific schools within the LEA or specific grade spans only, the LEA must enter "Specific Schools" or "Specific Grade Spans." Identify the individual school or a subset of schools or grade spans (e.g., all high schools or grades transitional kindergarten through grade five), as appropriate.

- **Time Span**: Enter "ongoing" if the action will be implemented for an indeterminate period of time. Otherwise, indicate the span of time for which the action will be implemented. For example, an LEA might enter "1 Year," or "2 Years," or "6 Months."

- **Total Personnel**: Enter the total amount of personnel expenditures utilized to implement this action.

- **Total Non-Personnel**: This amount will be automatically calculated based on information provided in the Total Personnel column and the Total Funds column.

- **LCFF Funds**: Enter the total amount of LCFF funds utilized to implement this action, if any. LCFF funds include all funds that make up an LEA's total LCFF target (i.e., base grant, grade span adjustment, supplemental grant, concentration grant, Targeted Instructional Improvement Block Grant, and Home-To-School Transportation).

    o **Note:** For an action to contribute towards meeting the increased or improved services requirement it must include some measure of LCFF funding. The action may also include funding from other sources, however the extent to which an action contributes to meeting the increased or improved services requirement is based on the LCFF funding being used to implement the action.

- **Other State Funds**: Enter the total amount of Other State Funds utilized to implement this action, if any.

- **Local Funds**: Enter the total amount of Local Funds utilized to implement this action, if any.

- **Federal Funds**: Enter the total amount of Federal Funds utilized to implement this action, if any.

- **Total Funds**: This amount is automatically calculated based on amounts entered in the previous four columns.

- **Planned Percentage of Improved Services**: For any action identified as contributing, being provided on a Limited basis to unduplicated students, and that does not have funding associated with the action, enter the planned quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%). A limited action is an action that only serves foster youth, English learners, and/or low-income students.

    o As noted in the instructions for the Increased or Improved Services section, when identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.

    For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which the LEA estimates would cost $165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of $165,000 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Service for the action.

Contributing Actions Table

As noted above, information will not be entered in the Contributing Actions Table; however, the 'Contributing to Increased or Improved Services?' column will need to be checked to ensure that only actions with a "Yes" are displaying. If actions with a "No" are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the "Yes" responses.

Annual Update Table

In the Annual Update Table, provide the following information for each action in the LCAP for the relevant LCAP year:

- **Estimated Actual Expenditures**: Enter the total estimated actual expenditures to implement this action, if any.

Contributing Actions Annual Update Table

In the Contributing Actions Annual Update Table, check the 'Contributing to Increased or Improved Services?' column to ensure that only actions with a "Yes" are displaying. If actions with a "No" are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the "Yes" responses. Provide the following information for each contributing action in the LCAP for the relevant LCAP year:

- **6. Estimated Actual LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on of the number and concentration of unduplicated students in the current school year.

- **Estimated Actual Expenditures for Contributing Actions**: Enter the total estimated actual expenditure of LCFF funds used to implement this action, if any.

- **Estimated Actual Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis only to unduplicated students, and that does not have funding associated with the action, enter the total estimated actual quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%).

  - Building on the example provided above for calculating the Planned Percentage of Improved Services, the LEA in the example implements the action. As part of the annual update process, the LEA reviews implementation and student outcome data and determines that the action was implemented with fidelity and that outcomes for foster youth students improved. The LEA reviews the original estimated cost for the action and determines that had it hired additional staff to collect and analyze data and to coordinate supports for students that estimated actual cost would have been $169,500 due to a cost of living adjustment. The LEA would divide the estimated actual cost of $169,500 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Estimated Actual Percentage of Improved Services for the action.

LCFF Carryover Table

- **9. Estimated Actual LCFF Base Grant**: Provide the total amount of LCFF funding the LEA estimates it will receive for the current school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Grant Program and the Home to School Transportation Program, pursuant to 5 *CCR* Section 15496(a)(8).

- **10. Total Percentage to Increase or Improve Services for the Current School Year:** This percentage will not be entered. The percentage is calculated based on the amounts of the Estimated Actual LCFF Base Grant (9) and the Estimated Actual LCFF Supplemental and/or Concentration Grants (6), pursuant to 5 *CCR* Section 15496(a)(8), plus the LCFF Carryover – Percentage from the prior year. This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the current LCAP year.

Calculations in the Action Tables

To reduce the duplication of effort of LEAs, the Action Tables include functionality such as pre-population of fields and cells based on the information provided in the Data Entry Table, the Annual Update Summary Table, and the Contributing Actions Table. For transparency, the functionality and calculations used are provided below.

Contributing Actions Table

- 4. Total Planned Contributing Expenditures (LCFF Funds)

    - This amount is the total of the Planned Expenditures for Contributing Actions (LCFF Funds) column

- 5. Total Planned Percentage of Improved Services

    - This percentage is the total of the Planned Percentage of Improved Services column

- Planned Percentage to Increase or Improve Services for the coming school year (4 divided by 1, plus 5)

    - This percentage is calculated by dividing the Total Planned Contributing Expenditures (4) by the Projected LCFF Base Grant (1), converting the quotient to a percentage, and adding it to the Total Planned Percentage of Improved Services (5).

Contributing Actions Annual Update Table

Pursuant to *EC* Section 42238.07(c)(2), if the Total Planned Contributing Expenditures (4) is less than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the LEA is required to calculate the difference between the Total Planned Percentage of Improved Services (5) and the Total Estimated Actual Percentage of Improved Services (7). If the Total Planned Contributing Expenditures (4) is equal to or greater than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the Difference Between Planned and Estimated Actual Percentage of Improved Services will display "Not Required."

- 6. Estimated Actual LCFF Supplemental and Concentration Grants

    - This is the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on of the number and concentration of unduplicated students in the current school year.

- 4. Total Planned Contributing Expenditures (LCFF Funds)

    - This amount is the total of the Last Year's Planned Expenditures for Contributing Actions (LCFF Funds)

- 7. Total Estimated Actual Expenditures for Contributing Actions

    o This amount is the total of the Estimated Actual Expenditures for Contributing Actions (LCFF Funds)

- Difference Between Planned and Estimated Actual Expenditures for Contributing Actions (Subtract 7 from 4)

    o This amount is the Total Estimated Actual Expenditures for Contributing Actions (7) subtracted from the Total Planned Contributing Expenditures (4)

- 5. Total Planned Percentage of Improved Services (%)

    o This amount is the total of the Planned Percentage of Improved Services column

- 8. Total Estimated Actual Percentage of Improved Services (%)

    o This amount is the total of the Estimated Actual Percentage of Improved Services column

- Difference Between Planned and Estimated Actual Percentage of Improved Services (Subtract 5 from 8)

    o This amount is the Total Planned Percentage of Improved Services (5) subtracted from the Total Estimated Actual Percentage of Improved Services (8)

LCFF Carryover Table

- 10. Total Percentage to Increase or Improve Services for the Current School Year (6 divided by 9 + Carryover %)

    o This percentage is the Estimated Actual LCFF Supplemental and/or Concentration Grants (6) divided by the Estimated Actual LCFF Base Grant (9) plus the LCFF Carryover – Percentage from the prior year.

- 11. Estimated Actual Percentage of Increased or Improved Services (7 divided by 9, plus 8)

    o This percentage is the Total Estimated Actual Expenditures for Contributing Actions (7) divided by the LCFF Funding (9), then converting the quotient to a percentage and adding the Total Estimated Actual Percentage of Improved Services (8).

- 12. LCFF Carryover — Dollar Amount LCFF Carryover (Subtract 11 from 10 and multiply by 9)

    o If the Estimated Actual Percentage of Increased or Improved Services (11) is less than the Estimated Actual Percentage to Increase or Improve Services (10), the LEA is required to carry over LCFF funds.

    The amount of LCFF funds is calculated by subtracting the Estimated Actual Percentage to Increase or Improve Services (11) from the Estimated Actual Percentage of Increased or Improved Services (10) and then multiplying by the Estimated Actual LCFF Base Grant (9). This amount is the amount of LCFF funds that is required to be carried over to the coming year.

- 13. LCFF Carryover — Percentage (12 divided by 9)

  - This percentage is the unmet portion of the Percentage to Increase or Improve Services that the LEA must carry over into the coming LCAP year. The percentage is calculated by dividing the LCFF Carryover (12) by the LCFF Funding (9).
